

The Litton Amateur Radio Society (LIARSI) made 204 contacts on 50, 144 and 220 Mc. Here W6ISO bears down at the 2-meter position of the club station, K6SLQ/6.

June V.H.F. Party Summary

Spring Contest Takes on Aspects of a V.h.f. Field Day

CONDITIONS make a big difference in a v.h.f. contest, and the big difference in the 1960 June v.h.f. Party was supplied by the ionosphere. At least some sporadic-E skip was worked by 50-Mc. operators in all sections of the country, and some tremendous scores were run up in the more favored areas. But perhaps the greatest factor in the ever-growing activity in our spring and fall contests is the enthusiasm of the groups that "work portable." Nearly one fourth of the 423 stations listed in the final tabulation below were portables, ranging from 1/10-watt battery jobs to multiband setups with all the features of well-equipped home stations.

The Waltham Amateur Radio Association lived up to their reputation as pace-setters for the portables. With first-class equipment on all bands from 50 to 1215 Mc. and a staff of 9 seasoned operators, W1MHL/1, Pack Monadnock Mountain, Peterboro, N. H., outdid all previous contest efforts, making 677 contacts and 42,472 points. These figures and their section multiplier of 58 are all-time records. They had rough competition from W1NBN/1, the station of the Merrimac Valley Radio Club on Mt. Wachusett, a line-of-sight shot just across the Massachusetts state line. W1NBN/1 had 645 contacts on 4 bands for 34,758. These are the first instances of more than 600 contacts being made in any kind of v.h.f. contest.

Top single-operator station was W1UIZ/1, Mt. Equinox, Vt. George worked 275 stations on 5 bands, for 17,212 points. Elsewhere many other portables were making the most of choice locations, and testing out v.h.f. setups that would be going again in the Field Day just two weeks away. Note the West Coast leader's 428 contacts on 50, 144 and 220 Mc. by WA6CID, the station of the Southern California V.H.F. Club, and contact totals over 200 by K6SLQ/6, K6HCQ/6, K6GPG/6, W6GGV/6 and K6UMM/6.

Working from the high spots was not without its hazards. The Greensboro (N. C.) Radio Club made a trip to Roan Mountain, Tenn., one of the higher points in the Great Smokies, and worked through fog and rain the whole time. Temperatures in the low 40s made fur-lined jackets welcome. W4NC/4, atop Mt. Mitchell, highest spot east of the Mississippi, also encountered cold and violent weather. K3IPM/3, Solebury Moun-

tain, near New Hope, Pa., was taken ill after 21 hours of operation, and had to be carried off the mountain.

Phenomenal conditions on 50 Mc. gave W4LIP, Miami, Fla. an opportunity to pile up 320 contacts in 39 sections, for 12,480 points, the country's top score for a home station. Though he has a kilowatt s.s.b. rig available, Vic made most of his s.s.b. contacts with his 5-watt exciter, in order to hold down QRM to others working in the contest locally. Another 50-Mc. leader was W1YL/1, with W1HOY operating. Helen worked 260 stations in 24 sections on 6. K1CRN, Providence, R. I., set the pace for 2-meter men, with 201 stations in 13 sections, for 2613 points.

Use of bands above 200 Mc. reached a new high. The 1215-Mc. band was used effectively by W1UIZ/1, with 5 stations in 4 sections — Eastern and Western New York, New Hampshire and Vermont. Like most others on this band, George used crystal-controlled gear on 1296 Mc. W3JZY/3 was helped along the way to their 23,256-point total by contacts on all bands from 50 to 3500 Mc. The Copperhead V.h.f. Society will bear watching in future parties.

Those who could make use of it found the new c.w. segment of the 50-Mc. band, opened only the previous week, fine for fattening up contact and multiplier totals. Working only 4½ hours, and using 50-Mc. c.w. only, W4FNR, Ft. Lauderdale, Fla., worked 87 stations in 27 sections. C.w. was plentiful on 144 and 220 Mc. as well. Though few v.h.f. operators think of c.w. as a medium of communication between friends ordinarily, more of them are coming to appreciate its contest potential all the time. — E. P. T.

SCORES

In the following tabulation, scores are listed by ARRL Divisions and Sections. Unless otherwise noted, the top scorer in each section receives a certificate award. Columns indicate the final score, the number of contacts, the section multiplier, and the bands used. A represents 50 Mc. B, 144 Mc.; C, 220 Mc.; D, 420 Mc.; and E, 1215 Mc. or higher. Multiple-operator stations are shown at the end of each section tabulation.
