

Team of the country's leading entry in the June V.h.f. Party, W1FRR/1, Mt. Greylock, Western Massachusetts Section. Left to right, rear, K1WTZ K1GSK K1BRO K1KEC K1NZF W1FRR K1VXD K1DIR W1LMZ W1ZIG. Front, K1PQO K1MVN W1EOA K1TCE K1COB. Missing are the photographer, W1ZBT, and K1BTF and W1RGM.

June V.H.F. Party Summary

Sporadic-E Skip Boosts Scores; Higher Bands Pay Off

JUNE being the prime month of the year for sporadic-*E* skip, it is not surprising that the ARRL V.h.f. Party often turns out to be a romp for 6-meter men. This possibility was, in fact, taken into consideration when our v.h.f. contest calendar was first laid out. And for the benefit of 2-meter men, September was selected for the other warm-weather v.h.f. party, as this is the year's best month for tropospheric propagation, over most of the United States, at least.

The 50-Mc. scoring possibilities always bring a few wails from the 2-meters-only operators, but our statistics for the 1963 June Party make it clear that use of both bands is a must, if one would place high in the more competitive ARRL Sections, or in the mythical national ratings. Starting down the list of high scorers in the single-operator category, you reach 9th place, nationally, before a one-band score is found. In the multioperator entries there isn't a one-band score in the top 20.

The sporadic-*E* skip in this year's hassle was not the equal of some past contests, in that

it was mainly a Sunday affair, but the second day surely was a wild one, almost everywhere. Unlike the usual condition, skip favored high-latitude contestants, as well as southerners, and some of the biggest multipliers were recorded by operators in the Middle West, the Plains States and even in Canada. The country's top 6-meters-only score was turned in by K4VWH, Herndon, Va.: 311-41-12,751. The fattest multiplier on 6 was 47, the work of WØYZS, Kansas City, Mo. His 247 50-Mc. contacts gave him 11,609 points. Third 6-meter score was by W4HFD, Eastern Florida Section, 273-38-10,374.

But look at a few of the scores resulting from use of more than one band. K3IPM, Philadelphia, leads all single-operator entries with 411-58-25,404, winning the Eastern Pennsylvania award. K2LNS, Somerville, N. J., took the NNJ award with 481-49-23,569. He used only 50 and 144, while K3IPM worked on these bands and 220 Mc. W1RJA, Milford, Conn., pushed hard on 50 and 144, for his 387-44-17,028 score and the Connecticut wallpaper.

Caravan of the Southern California V.h.f. Club arrives at the summit of 8000-foot Frazier Peak, in the Santa Barbara Section. The two camper pickups provided operating space for 220, 420 and 1215 Mc., while the club's trailer housed the 50- and 144-Mc. stations. K6BPC/6 compiled one of the biggest scores in the history of v.h.f. competition west of the Mississippi, 699 contacts, for 40,260 points. Operators in this picture are WB6COA WA6WIZ WA6AJT and WA6DJB. On the right, WA6AJT, trustee, and WA6DJB, president, unload some of the gear used by the Southern California V.h.f. Club station, K6BPC/6 in the June V.h.f. Party.

From September 1963

ARRL

W4WDR didn't have to go hungry while rolling up points for K5FGI, Amarillo Air Force Base, in the June V.h.f. Party. His 312-40-12,480 score won in the North Texas Section.

K2CBA, Troy, N. Y. (a long shot in view of his location well out of local range from the high-activity metropolitan areas) used 50 through 420 Mc. effectively for a 303-52-16,796 total, and the ENY certificate. The operator of K2CBA for the contest was WA2IUL. A tremendous antenna installation and high power on all 4 bands were important factors in this achievement. W4LIP, Miami, would have done right well on 6 alone, but he fattened up his total with work on 144 and 220 and turned in 407-41-16,728 — the best score made outside the northeastern v.h.f. territory.

Fellows who have felt that living far from the high-activity centers is a severe handicap can take heart from 5-figure scores like that of KØUDZ, Rapid City, S. Dak., 312-38-11,856. This writer took time out from a Dakota Division Convention some years ago to make a try from a high spot near that Western South Dakota city — and got an 0-0-0 rating to show for it. Things must have changed since 1954! WA4FIJ won the Western Florida award with 329-40-13,160. K5FGI, operated by W4WDR, polished off North Texas with 312-40-12,480. XE1OE, Mexico City, won in the "foreign" category with 154-44-6336. And how about that Manitoba winner, VE4MA with 182-29-5278? Or KØZZM, who won in Colorado with 199-37-7363. Even VE8BY was able to work 11 stations in 6 sections from Yellowknife, N.W.T.

Perhaps the rarest coup in the history of v.h.f. contests was pulled off by W5KHT, Oklahoma City. Bob was hearing very short skip on 6 around the time that he raised CO2DL, at 0851 CST. He changed quickly to 144 Mc. and worked CO2DL crossband duplex for several minutes. A neat trick — but no cigar. Crossband contacts don't count!

Expeditions to choice v.h.f. locations in many parts of the country provided hundreds of contacts that might not otherwise have been possible for most of us. Who would have gotten Quebec without VE2SH/2, 243-42-10,248, or West Vir-

ginia without K8OEN/8, 411-45-18,495? The mountains of our Pacific Coast states provide innumerable sites for this kind of thing, and group efforts enliven the contest immeasurably for the city dwellers.

Supreme western effort in the mountain-topping field was by the Southern California V.h.f. Club. With two camper-type pickups, the club trailer and a station wagon, this team trucked gear for 50 through 1215 Mc. to Frazier Peak, in the Santa Barbara Section. K6BPC/6 made 699 contacts, third highest in the nation, which with their 55 section total gave them 40,260 points, sixth in the country, and one of the best scores ever amassed west of the Mississippi.

WØWYZ/Ø and WØDK/Ø put Colorado on the map in a big way, winding up with almost identical scores. The former used 50, 144 and 420 while WØDK/Ø worked all bands from 50 through 1215 Mc. Their tallies: 371-44-16,412 and 314-46-16,008.

Three multiop entries made scores over 50,000 points. The Dutchess County V.h.f. Society, K2GCH/2, Overlook Mountain, Eastern New York Section, worked all bands through 1215 Mc. for a 599-79-53,167 score. W1BU, the Rhododendron Swamp V.h.f. Society station, stayed home, and poured on the coal all across the spectrum for 823-74-70,152. And the top effort of all: W1FRR/1, King Philip Amateur Radio Society, operating from Mt. Greylock, highest point in Massachusetts — 970-84-89,292 points, made on all bands from 50 through 10,000 Mc.

Warning to the Over-Eager

Competition is getting keener with every v.h.f. contest, and in the drive to pile up big scores an increasing number of violations of either the spirit or the letter of the rules are being observed. We've done little policing of the v.h.f. contests in the past, but some will have to be done if certain operating trends are not corrected.

Highest station in Eastern U.S.A. was W4SKH/4, operating from the summit of Mt. LeConte, Tennessee. Seen here are K4OYF K4FPT W4SGI OZ9FL and a hiking companion.

1. Stations operating away from the licensed location must sign properly, to indicate their portable status. Many operators are skipping this necessary formality; necessary to comply with FCC regulations, and to keep contest records straight. Full compliance with FCC rules is required of all ARRL contest participants. Be sure that every one of your operators understands this, and follows through consistently with at least the "portable, Western New York" required by law.

This is important in other ways, too. W1HDQ and W1HDQ/1 are separate stations, and count as such in your log. The writer, who usually works portable on the second day of a v.h.f. party, has to explain this over and over to many operators. But if I do not sign /1 the second day, and your log-keeper does not enter me that way, the second contact will not count. It will be thrown out by the contest checker as a duplicate. Your entry may be disqualified if your operation has not been conducted properly.

2. Note carefully the new Rule 3. A transmitter used to contact one or more stations may not be used subsequently under any other call during the contest. You can no longer use one set of gear for the microwave bands under various calls, to build up your score. One call *only* now, per station. The only exception is family-type stations, at the location for which family-type operation is licensed. This rule applies to all ARRL contests, including Field Day.

3. Several complaints have been received of illegal and apparently intentional interference by v.h.f. contest operators. Over-modulation, piling-on, malicious interference and other illegal or unethical practices have no place in the world above 50 Mc., at any time. Let's keep our perspective, during contests and at all times. Definite evidence of illegal operation can bring on disqualification, but matters should never have to go that far among friends. Who gains from such procedures? — E. P. T.

SCORES

In the following tabulation, scores are listed by ARRL Divisions and Sections. Unless otherwise noted, the top scores in each section receive certificate award. Columns indicate the final score, the number of contacts, the section multiplier, and the bands used. A represents 50 Mc.; B, 144 Mc.; C, 220 Mc.; D, 420 Mc.; and E, 1215 Mc. or higher. Multiple-operator stations are shown at the end of each section tabulation. An asterisk denotes a Novice Award Winner.
