# **Results, 1969 ARRL Novice Roundup**

REPORTED BY BOB HILL,\* WIARR

Two Hudson hotshots: Division champeen WN2DFD (left) daydreams a bit while companion Shandou (HS1CAT) enjoys some nice warm plate dissipation. WN2FSF (right) attacked the ether for 23K in 27 hours; that NCL-2000 is a no-no for Eric, of course—it's used by brother WB2TKP and OM WB2TKQ.

TINETY-two Novice entries . . just 15 higherclass logs . . . a top score of 6392 points . . . Don't get excited: we're talking about the very first "Nervous Roundup," held way back in January 1952! But that infant NR has grown into a muscular 17-year-old by now, and the growth has been spectacular. The 1969 Roundup boasts 473 logs (320 Novice, 139 General-and-up, 14 checklogs) and some phenomenal scores - in fact, no fewer than 149 WNs exceeded the score of 6392 that was good enough for first place in '52. The one who exceeded it the most was WNØVKP, whose score of 53,970 is an easy record-breaker and one that may not be topped for many years to come. His and 58 other section awards will be hitting the mails in mid-June.

Miscellany: This NR was the first in which a Novice had a second chance to win a section award or lead his section two years in a row the latter feat pulled off by WN4HOK (Tennessee) and WN6ZXN (Orange). . . Seventhcall-area participation and log submission was the best ever; keep it up out there! . . . Despite

\* Assistant Communications Manager, ARRL.

our request, many non-Novices insisted on braying CQ NR instead of answering WN callers, thus creating unnecessary QRM for the newcomers. . . There has been a lot of sentiment in favor of cutting down the contest period. How about one full week bracketed by two weekends (i.e., nine days)?

One thing is for sure: this is one contest in which *everyone* wins. If you weren't first in your section, at least you got your code speed up or landed some new ones for WAS. Glad you could make it, OM!

### Soapbox

"Lots of fun, but relatively slow after second weekend. Nine days should be enough." - WN3KDR. "The last few days I couldn't find anyone." - WN3LMO. "Some Novice entrants in the NR are going to become first-rate c.w. ops." - WA3JAP. "Found the information in QST and decided to give it a try. What a surprise! First of all, these Novice operators had pretty good fists; some sounded a good bit like W1AW during code practice. Now I know where all those hot operators come from in the other contests. It was my first experience with the Novice operator and I can only say that they appear to be a credit as well as the hope of ham radio. Aside from making me feel very old and in need of improving my operating skill, I am pleased to have made the discovery." — W3EYF. "Had to fight for rig, as OM entered also." — WN3LEQ. "Even though Murphy's grim legions reared their pointed little heads, I still had a groovy time. One thing, though; shorten it to one week." — WN2GFE. "The Generals caused more QRM on the band calling CQ NR than all the Novices together." — WN2EKW. "Really enjoyed it, but think it should be only on weekends. I worked W1AW for the first for us grandpas. Keep up the good work." - WN2FBE. "Heard a lot of WP4s and worked one but none of them were in the NR." - WN2HJY. "I haven't had so much fun since the day I first used a homebrew crystal set to listen to local stations, and that was about 40 years agol Yes, I'm a 51-year-old Novice and proud of it." — WN2GPO "Actually it's a wonder I had any points at all. My whole family, including myself, was in bed with the flu for four days; I lost my DX-60 for two days (bad tubes); on 80 meters my s.w.r. was so high I couldn't read it; and I was using an indoor antenna for all bands. But with all this I

If you attended the sixth grade in New Orleans you just might have **WN5UWH** for a teacher, Gay's OM is K5MBE.

Whatever happened to the end-fed hunk of kinky wire running ten feet off the ground to a tree branch? Today's with-it Novice employs such sophisticated machinery as (top) WN1JFG's 3-element 15-meter beam on a 37-foot tower, (center) WN7IWU's 2L quad for that nice lowangle DX, and (bottom) WN5UHX's new Delta Loop, an effective performer on 21 MHz.

still had a great time." — WN3IGT. "Adding RST to the exchange would make QSLing easier." — WN9ZXU. "With very few exceptions, everyone I worked or heard exhibited very good operating procedures. A lot less endless repetition "You guys really know how to put on a contest." — WN9-ZGO. "Our section of town had a power failure during the last Code Proficiency run, so I couldn't qualify." - WN9-ZXE. "A good receiver, good transmitter, low s.w.r., lots of time, and an unusual call, resulted in what is probably the lowest score in my section. The contest should be shortened to either one week or two weekends." - WN9YYY. "All phases of the NR were great, except I heard a lot of Generals calling CQ NR instead of only answering the CQs of Novices." — WN9WKA. "I think anyone working the NR should work with the same power input we Novices do."-WN4JKU. "We have the Simulated Emergency Test to find out about the shortage of good c.w. ops, then we have the Novice Roundup to find out that there's still hope." - WB4JFT. "Worked my 50th Novice state in the '69 Roundup. Lots of good operators on this year.' WN411F. "Each new crop of Novices seems sharper than the last. The NR is my favorite contest. Hope to put in more time next year; by then the XYL (WN4IIF) will be a General and won't have the equipment tied up." - W4-YOK/4. "What an experience the NR was! Even though for two weeks my wife wouldn't speak to me and my kids didn't know me, it was great. Although my family is glad it's over, I'm all for contests (in moderation, of course). WN8ATX. "Sorry I didn't do a well as last year, but school activities prevented it." — WN8ZBJ. "With the lack of selectivity of my 2-tube regenerative receiver, I had the 'advantage' of being able to hear almost everyone in the contest on 80 meters at the same time (at least it seemed that way)."- WN8AZN. "Great contest until I tried for two JA1s which got lost in a pileup of NRs." - WN2EBJ. "It was frustrating to hear some Novices calling CQ NR twenty times or more before signing. During the contest, on 80m, I was surprised by a call from 6Y5UC. I wish I could have gotten on 15 for additional multipliers. It was a fine experience, especially working W1AW." — WN2GOR. "Just before the NR began, my mother decided it was

about time for me to start worrying about college. Therefore, every night I was bawled out for 'sitting behind that stupid radio' and not reading catalogs and cramming for college boards." — WA2EUX. "Only wish that I had a transmitter on 15 meters and maybe another crystal to keep my lone present one company. It's rough when Generals with v.f.o.s swoop down on a CQ NR before you can." - WN2-FIU. "A couple of things that didn't help me were the guys that want to ragchew in a contest QSO and the guys that think Op Aid #6 is something to soak their feet in, or think that two QSOs are better than one! A certain WN4 must have enjoyed the contest too, because he was still calling CQ NR two hours after the contest had ended!" - WNØ-VBW. "It's nice to be in a contest where you don't need a Hill KW into a 90-element beam to get any kind of a score." - WAØUIS. "Got my last two states for WAS, a Brazil QSO and one in Peru. What more could you ask for?" WN1JFG. "I have had my license 3 months and I sure do like hamming. I almost ran out of time because I started out slowly but then at the end I really hurried. I am 9 years old and in the 4th grade." — WN7LIX. "Thought it was great fun, in a miserable sort of way."-WN4KFZ. "Sounds like a great group of new operators coming along; wish I could have spent more time." — W4KFC. "During the NR I was called WNØUJO, WNØVJM, WNØAJT ... In fact, I was called so many different things that I was checking my license after every contact." —  $WN\emptyset UJO$ . "The most helpful thing I had, thanks to my dad and a friend who couldn't take his beam with him when he moved, was a TH4 beam up a good steady 70 feet. I don't imagine very many Novices have that kind of antennal" - WN7-JLO. "Let this be a warning: tell W4KFC I'm going to

## June 1969

## From June 1969 QST © ARRL

challenge him for the SS this November!" - WN4LNM. "Now I know: simple equipment produces simple results." - WN4LEM. "Amazed at the exceptional operating ability of these newcomers. Hard to believe many had over 100 QSOs after only two days." — K4IEX. "I really enjoyed taking part for the first time in this contest. It's more like ay speed. Next year I hope to give more Novices their first VE5." — VE5TT.

### Scores

Listings are grouped by ARRL divisions and sections. The operator of the station listed first in each section is award winner for that section. Example of listings: WN3KFR 18,003-353-51-20, or total score 18,003, different stations worked 353, sections worked 51, total operating time 20 hours.

If you plan ahead, borrow lots of crystals, have an outstanding signal, and go-go-GO, you too can pile up 771 QSOs, 70 sections and 53,970 points—just like WNØVKP. (So why didn't you?) Bob's QSO average of nearly 20 per hour is one that will be plenty tough to surpass in future NRs.

The Seven-Land boys turned out in fine style this year. One of six Arizonians to submit NR logs was WN7KBN, who notes that it's hard to avoid interruptions when you're a priestl

969 QST © ARRL

From nine logs in '68 to twenty-five logs in '69—that's the gratifying increase in output from the seventh call area. Some of the scores were whoppers, too: WN7KLP (above) paced Montana and the Northwestern Division and attained the sixth-high score among all entrants; WN7IOY (upper right) was boss man in Arizona and the Southwestern Division, plus finishing tenth overall; WN7 JKQ (lower right) was Oregon's leader and just missed the Top Ten listing.
