

# Results, 39th ARRL November Sweepstakes

Reported by Rick Niswander,\*  
WA1PID/WA8VRB

**P**RESS ON, INDEED. The adjacent treatise (sent to us through the kind graces of the XYL of W9DOB) exemplifies the one characteristic that makes great contesters great. No competitor, no matter how talented or erudite in the tricks of contest operating, will win without the firm application of the seat of the pants to the seat of the chair for hours of key-swatting or mouth-moving.

We all start from humble beginnings in the contest game. KN1ZND had only 25 QSOs in 26

\*Asst. Communications Mgr., ARRL.

hours in his first contest — the Novice Roundup of 1963. KN1LPL did a bit better with 48 QSOs in 33 hours in the NR of 1960. In the 1955 NR KN4BAI topped the two previously mentioned laggards with 65 in 37. All pretty sad scores when compared with their current accomplishments. But these are scores from years ago and many a NR, DX Test and SS has passed since. It was only with the application of the principle established at the left that they became the type of competitor they are now. Granted, talent, education in the tricks of the trade, and yes, even a little genius, all combined to help produce their scores of today. But without their stick-to-it-iveness, their willingness to try again after failure, their dogged persistence, they might have given up contests to pursue some easier, not so frantic, aspect of our (or another) hobby.

But this adage does not apply to the big contestants only, not by a long shot. As WA6PYS succinctly put it in his SS comments: "Very few contestants expect to win; otherwise they'd drop out when they find themselves hopelessly behind. But there is a strong urge to continue; to build up your score and skill." Most of us in highly competitive sections such as MDC, VA, WA, OH, CT, etc. know we don't have a chance to take the section certificate. We need to look at the contest from a different angle; still with an eye to our saying. Hold your own miniature competition with your friend down the street who has the same limitations as you, be they operator or equipment. Compete with yourself; compare last year's score with this one. Be careful, though. Setting too high a goal, such as shooting for the MDC section award using a tri-bander at 30 feet with average operating abilities, can sour one on contests. Set an attainable goal and go after it. If you succeed, you've won! You may not receive a piece of paper attesting your contest prowess but *you* know what you have done. A paper award can be chomped to bits by the family dog or burned to a crisp. A personal achievement, recorded historically in *QST*, is something you can remember as long as you live. There is something in each contest for each one of us. We need only look for it, set it as our goal, go after it and — hopefully — obtain it. Even if we don't quite reach our personal pinnacle, take heart in the fact that the only losers in Sweepstakes are those who don't participate.

The 39th November Sweepstakes, held November 11-13 on phone and November 18-20 on cw, registered a drop in entries of about 12% to 2065. Cw logs still outnumbered phone entries 1042 to 994; check logs numbered 29. Participation appeared high; scores were at approximately the same level as last year. We just didn't receive quite as many logs this time.

For the past few years the "Clean Sweep" has been easy on phone and difficult (to say the least) on cw. This year was no exception. Phone Clean Sweeps numbered a hefty 102 (a drop of 23) while cw Sweeps amounted to only 16 (down 13 from last year). Wyoming was the only section that could be remotely considered difficult on phone — we had 3 VE8s, 4 or 5 KL7s, bunches of VE4s and VE6s, a few VE5s and KZ5s and an adequate

**TOP TEN**  
*(Single Operator)*

<i>CW</i>		<i>PHONE</i>
W7RM	167,325	W7RM
W6MAR	162,225	W9YT

		173,100

supply of Vermont and VE1s. On cw, these sundry sections seemed to sink into the salty seas (which is kinda hard for a VE5). Nevada, Mississippi, VE8, W.I., VE6 and VE4 seemed to be the most difficult. They were there, however, since 16 lucky souls snagged all 75. Mega-thanks to those who participated, on either mode, from the usually hard-to-get sections. Your occasional answer to a CQ, or time spent being the object of a pile-up, is gratefully applauded by all SS participants. Your appearance is an important and exciting facet of the SS or any other contest. Congrats to the following who made the Clean Sweep on both modes: W8OK, W7RM (K7VPF, opr.) W6NUT, WB4YOJ, K4CG and W1ICP (WA1PID, opr.). Each year someone tries to make "75 in 75" (a Sweep in 75 contacts). This year W8OK accomplished that feat on both modes! Hq. made a Sweep on phone, receiving logs from all 75. On cw we had to settle for 74, lacking only Nevada.

The 1972 SS was the first contest in which the new disqualification criteria were applied — and applied they were. Numerous dupe checks were made, with most resulting in a lowered score. The penalty provision of the criteria (item 6 on page 55 of November 1972 *QST*) dropped some scores considerably. If you find your total scalped by a few hundred or thousand points your dupe checking procedure (or lack of it) is probably the culprit. If you still have a question on your entry (and yours alone) drop me a note and I'll lay my info on you.

Speaking of rules and such, the Contest Advisory Committee (W1BGF (chairman), W2EIF, W3BQV, K4BAI, K5TSR, W6DQX, K7NHV, WA9AUM, W0HP, KH6IJ and VE2NV) is ready

Second spot in SCV goes to WA6GFY, operated by WB6EXW. In his second year of SSing Gary racked up a very creditable 92K on phone. He heard two sections that he didn't work because they were operating in the Advanced section of the band.

Traversing the country from his WPA home to Michigan (attending MSU) to California (attending Berkley) and now settled (for a while anyway) in Southern Texas, WA3GBU/5 has experienced contest conditions from all over the U.S.A. Tom garnered 116K on cw (with help from 3 and 4 element monoband twirls at 70 feet) and was one of the operators at the nation-high phone multi-operator setup of WB5DTX. The licence plate is a memento of his California stay.

and willing to accept for study any comments or suggestions on the SS. Drop them a line.

A number of entrants remarked about the absence, in many cases, of manners, even downright rudeness, on the part of some. Having been on the soapbox before I'll let someone else have a go at it. K1VTM makes some good points on this subject (he is talking about the cw bash but his ideas are applicable to either mode): "Check out a new frequency before pouncing on it. IE, ?, or QRL? can help. Be sure to zero properly. Most cw filters have narrow passbands. QRM to adjacent channels will be minimized, too. Use a dupe sheet. How would you like to be called by the same station 6 times? Keep calls short. If the other guy has your call, repetition should be minimized. Don't take over a busy frequency. Courtesy dictates that the first guy there has preference to continue." Well said, Ron. The only thing I could possibly add to that is: *don't* repeat the exchange unless asked to do so. If you receive an exchange sent once, there is no reason to repeat your transmission two, three or even (gasp!) four times. If the guy on the other end needs a repeat he will ask for it — don't waste his time and yours reviewing your message. The most time consuming,

Number Ten in the country on phone, top Colorado, and top WØ is WAØQLH operated by WBØDJY. George was aided in his contact quest by monoband beams at 70 feet and a KW amplifier. The glass of ice water is a good way to keep your throat lubricated and prevent tonsil dehydration.

### SOAPBOX

#### Clicks

I guess next year I'll have to increase my power to 10 watts. — (W4ZRJ) A KL7 dupe? Fantastic! — (W4OZF) Scylla and Charybdis are pikers compared to Murphy and Parkinson. Oh, woe is me! — (W2WOE/4) I'm willing to start taking a collection to send good cw ops to VE8 and KZ5 or to train any phone men who want to learn the code. — (W1BGD/2) Very pleased to hear of the new regulations governing contests. Wisely done! — (VOICA) Was interesting as well as very frustrating to try QRP (8 watts) during the last half of the contest. Let's see. . . 55 QSOs at 8 watts makes it 7 QSOs per watt, therefore, I have come to the conclusion that if I run a kilowatt next year I should have 7000 QSOs! — (VE3EEW) Greatest achievement during SS was working WA4BAT and WB2MAN in consecutive QSOs. — (W4KFC) Crystal controlled on 7048, with a QRP signal thin as a prairie wind whistlin' through a barbed wire fence, and a background noise like a hundred empty freight cars rollin' down grade off a San Francisco slope — that's the SS biz! — (K4DHB) And so it was decreed: QRM shall reign. — (VE7BBL) Missed VE4. Heard one on 21 MHz. (VE4HH) but skip was bad at the time and he eluded me. Lost a lot of contacts just because I stubbornly kept looking for that last section. I also think that I worked the largest collection of lids ever. Why do some of these guys insist on repeating everything when they have already accepted the message that was sent just once? Ugh! — (W4DQS) My last SS was in 1962 (the old 40-hour variety). This one was great fun; a short period — do or die — and a meaningful exchange. — (W6MYP) One

(Continued on page 68)

and possibly the most frustrating aspect of the SS is not the time you spend sending your exchange but the time spent by the guy you are working in sending his. 'Nuff said.

Congratulations to all section leaders. Your awards are scheduled for a May 15th mailing. The accomplishments (and disappointments) of you and all other participants cannot be chronicled in this short space; we leave that chore to the scores and the soapbox. Don't be disappointed if your picture or soapbox does not show up here. We get so many that prudent picking is the order of the day. Try again next year with a different picture or comment; you may more closely capture the situation.

We cannot leave this lovely lead without pausing to rejuvenate our tired minds with an imbibition of cool, clear statesman-like oratory from our very own master of melodic mottos and prolific prose, V.Y. Senny Tree, who said, "Before the contest begins SS stands for Sweepstakes; sometime in the middle it stands for So Silly and at the end, after hours of battered ears and broken pencils, SS stands for So Sleepy."

Thank you. . . . and goodnight. Zzzzzzzz

Four clubs rose within or into the Top 10 rankings this year, three of them never having appeared there before. The most spectacular rise was the Buffalo Area DX Club who took 9th after not having an entry last year. A no less spectacular jump was recorded by the Norwood Amateur Radio Club who nabbed 7th after placing 46th in 1971. The Wisconsin Valley Radio Association jumped nine spots, grabbing 10th this year. The other club that advanced in the Top 10 listings was the Northern California Contest Club who moved up one notch to 8th spot.

In contests, recognition is given to single and multi-operator stations on a regional basis such as sections or divisions. Following the same line of thought (and in addition to our regular listings) we have listed the top club in each call area this year. They are:

1 - Murphy's Marauders 2 - Buffalo Area DX Club 3 - Mason-Dixon Pirate RS 4 - Potomac Valley RC 5 - Texas DX Society 6 - West Valley ARC 7 - Radio Club of Tacoma 8 - Indian Hills RC 9 - Wisconsin Valley RA Ø - Minnesota Wireless Club

The concept of a regionalized format for club competition has been batted around these parts (and within the CAC) for some time. The CAC and HQ would appreciate additional input from the field on this idea. Should the "by score" listings of the clubs be dropped and a "by score within call area" listing be instituted? Should the regionalized competition be dropped altogether? While you are writing, give your opinion on the idea of separating the SS weekends by one week - allowing a free weekend in the middle to repair antennas and household relations.

K2AU, before and after (no, no, no. The before picture is on the left). Joe took the NLI section on cw with over 105K. I guess winning a section takes quite a bit out of a person.

rather interesting contact was with the Novice that indicated a precedence of B. — (W6DQX) Few operating hours due to XYL overheating. — (WB2GUL) All the sevens in Wyoming and Nevada must have gone to Washington. — (K8OQL) Very difficult to compete in Kentucky. My son, K4GSU, is much too tough for me. — (K4QW) I just can't understand the need for rushing from station to station without being sure that you were good copy. — (WA2IFE) When the brand new rig blew up prior to the SS, disgust was the order of the day. I pressed the Argonaut back up rig into service and, what do you know, EPT was right; you can't win the SS with one but you can have a lot of fun. — (WA6QQI) I remember when Idaho used to be a rare contest multiplier; but not any more. — (W7IUC) I had a lot more fun than I did sleep. — (WN8KO) Where do they hide Alaska? — (WA1MYK) I decided to make this a completely QRPP operation. My maximum power input was five watts. Although my signal was not competitive with the higher-powered stations I did manage to work many sections. I even worked a couple of ZLs on the side. — (W9PNE) It was fun to operate simultaneously in the SS with OM W9LVH. The vast span between our scores resulted from the vast span between our skills plus off-time caring for 6 week old Jr. Op. number 1. — (WN9HGN) Not only did my 14-year-old neighbor more than double my score but I had an angry XYL all weekend because of a wedding anniversary that landed on the second day of the contest. — (WN4AVG) Almost gave up when the flu struck early in contest but K9LBQ's prescription of 500 mg. of Vitamin C every 50 contacts saved the effort. — (WA9TPV, opr. at W9YT) Entered this SS after 15 year absence. More fun than ever. — (W0HAW/6) If the guys knew I am a 16-year-old YL I probably would have done a little better. — (WN2JLM) Great Scott! Two Wyoming, three Vermont, six Utah, six Idaho and ZERO Mississippi — (W4UQ) Fifteen minutes after the contest ended my hot water heater gave up and spewed water all over the kitchen floor.

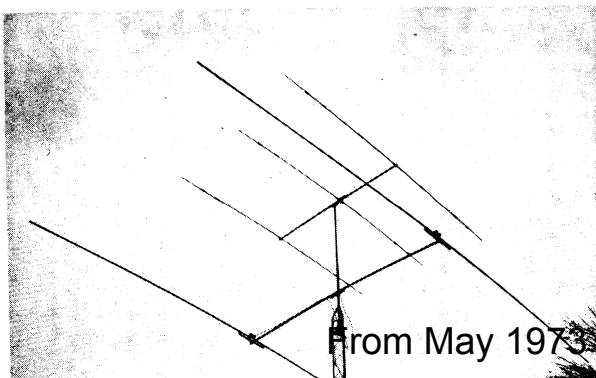

Glad it waited. — (WN6RXI) Great contest — but I wonder how many points K0DDA and I cost each other? — (K9DDA) I would like to see how my yester-year heroes would do today against the new crack operators. — (W9DOB) On Monday evening I was visited by a Market Research interviewer who

The signal at multiop WB9IDS was helped considerably by this 40 meter beam at 40 feet and the TH-3 10 feet higher. Using low power WB9s IDS, EBP and JKF racked up a nice 126K showing on phone from Illinois and took the Central Division multiop leader spot at the same time.

One of the many MDC cw entries was WA3QDH shown here scratching for another QSO. Robb used Drake gear and a 14-AVQ during his cw effort. He also operated in the WA3GIN multi setup on phone.

interviewed me about my radio listening habits. She asked if I listened to the radio over the weekend! — (K4BAM/4) Wait 'till I get a better receiver, a bigger antenna, an amplifier. . . . — (WA1MHJ) A word of thanks is in order to the speed demons who QRSED for us slower fellows. — (WB2FKF) There must be something terribly masochistic about a person who spends hour after hour in a hard chair, hunched over a key, with all the filters in, the volume too loud and wearing those God awful phones. If so, why do I hate myself and when is the next SS? — (K0FRH) Again, the SS is the king of all contests. Great excitement, challenge and fun for all. — (W4YZC) Next year, high power for both contests. Maybe I'll raise my antenna higher also. This power/cost race is something that we need to consider terminating. — (W5QGZ) Of stations worked from K8IKO, 84% were using more than 200 watts, and I would suspect from the strength of the signals, that most of the A class stations were running 150-200 watts. The result was, from the torture-chamber between my headphones, a deluge of power; a deafening, brain-numbing torrent of kilowatt signals that represents the most exaggerated electronic overkill I have yet heard on amateur bands. — (K8IKO/8) Must be a record for the coldest shack — 36 degrees. My fingers froze to the bug. — (WA8BHR) Been a ham 20 years and this is the first contest I have ever entered. Really enjoyed it but wish I had more time to operate. — (K4FCZ) Got my cast off and pin taken out of fractured right thumb three days before cw contest and could move thumb just enough to send. — (WB4SVX) Finished putting beam on rooftop of apartment building 20 minutes before start of SS. Lots of time for checking it out. — (W2FVS) Most fun I've had since the Novice Roundup — (WB2ADW)

#### Splatter

The ARRL Sweepstakes certainly gives one a fuller understanding of just what the word "contest" means. That old familiar "itch," the stirring of the blood and that faraway look are just a few of the symptoms that are frequent visitors here whenever the word is mentioned. Guess I've really got the bug. — (WB4OGW) Expect to operate W7LR/7 multiop next year from Wyoming, phone and cw. — (W7LR) When I told the XYL about the fellow who gave me his number 1 with two minutes to go in the contest her answer was, "That sounds like the only sensible guy in the whole batch." — (W7FXQ) Most fun was operating from Quebec and feeling wanted. — (W3GRW/VE2) There ought to be a rule about operators with marbles in their mouths and no knowledge of phonetics. — (WB2GUB) My presumed "clean sweep" fell prey to a bookkeeping oversight! Thought I had Oregon tucked away early in the contest only to discover (after the SS was over) that it had eluded me! — (W4KFC) Had to rescue a squirrel who fell 25 feet down our chimney behind the fireplace damper during the phone SS. — (W1ECH) How about a mobile category so I can beat somebody — anybody. — (W4OZF/4) Got so excited on working my fourth Delaware in 15 years that I forgot his call. — (W4HOS) It didn't

bother me that a couple of guys said "Hi Bob" while Dave (K1ZND) was at the mike – but it really jolted me when somebody called me and asked "Is that Dave?" (If the asker had been in Wyoming, I would gladly have given him any answer he liked!) – (W1ARR) Next year I'll make sure I don't have to babysit during the contest. – (W9CQD) I'll never operate Sweepstakes again. . . well, not until next year. – (K3DVS) Seems like everybody in Virginia was operating SS. Toughest competition I've ever faced. – (WB4UOX) [He ended up seventh in VA with over 100K. – Ed.] Enjoyed it very much although one fellow in W4 land insisted there was no room for a DL in a U.S. SS contest. – (DL2AA/W1) Next year I have to remember to keep a dupe sheet *during* the contest, not after. – (WB2GUQ) Very fortunate that Murphy missed Newfoundland for this year's SS. Three weeks after SS-72 we obtained 100 mph winds and I lost my rotor. – (VO1CA) [That's all you lost?!! – Ed.] Conditions were never like this when I was VE8BB. – (VE6MP) How about a separate category for people who live in N.Y.C. and have to use indoor dipoles inside steel and concrete buildings? My first SS was a madhouse but somehow enjoyable. – (WB2UFN) I like the stricter new competition rules even though I had to dupe the logs three times to get rid of all the dupes. – (WB4NFQ/4) Have been in SS contests since about 1938. It was a real pleasure this year to go multi-op with an 18-year-old ham who is a tremendously good operator and who produced a clean sweep "first" for my station. – (W6OKK) Found that "Radio Macaroni" worked well phonetically; it's easily recognizable yet different enough to attract attention. – (K7VPF, opr. at W7RM) Taking 5 hours off at one shot proved advantageous – fewer "cobwebs" to deal with. – (K1VTM) My rotor control box wouldn't indicate so a 150 watt spotlight and a mirror outside the window by the shack did the trick. I wonder what the neighbors thought? – (WB2RJJ) Worked WA2RZA and WA2RAZ in succession; both number 7 and both NYLI for a real double-take on the check sheet. – (W0BWJ) The toughest part was sorting out the log sheets afterwards (which is a small price to pay for enjoyment received). – (WB6DBO) Where I was, Murphy was. – (WB0CLY) I wonder how much time I lost listening to remarks about my call. – (W1FCC) SS gave me will power to take Advanced. Heard a KH6 and KL7 but in the Advanced band. – (WA3QLG) [Now that's what I call *real* incentive licensing. – Ed.] If I flunk my First Phone it's your fault for not letting me get any sleep this weekend. – (WB4HUS) Never have 309 QSOs been so difficult. – (WA3QIA/3) I sure can't forget when the SS is. That is the weekend my beam always falls down. – (WB2JSJ) Ninety mph winds slamming into the shack on top of Raindow Ridge caused more QRM problems than did the entire SS contest. – (K6BCE) Football on TV makes it hard for us contestants. – (WA5FII) Old finals never die – they just fade away. – (WA1LAI) I am getting awfully fed-up with guys who don't check dupe

### CONTEST PERIODS

1973

Starts	Ends
Saturday, Nov. 10 2100 GMT	Monday, Nov. 12 0300 GMT
Saturday, Nov. 17 2100 GMT	Monday, Nov. 19 0300 GMT

sheets before calling. I assume they keep dupe sheets. – (W4NQA) My biggest problem in the contest was after 250 QSOs I forgot what section I was in and could do nothing but mumble into the mike until I recalled it. – (WB6KMW) Needed only VE3 to make sweep with almost 4 hours to go in contest. Guess who didn't show? Must have missed them in the QRM from the VE8s. – (WA6NYV) As you might know it – ice, rain and finally snow kept the beam in the factory carton. – (WB8IDK/9) Hooray for the VE stations. Never heard so many VE4-6s. – (WA0WEZ) Weekend was a disaster. Interfered with college police on 40 phone so couldn't use linear or beam. Fifteen meter antenna fell down and my body died at 5 o'clock Sunday afternoon. – (WA1LX, opr. at W2CXM) The one effort which brought the club together. – (WA4UCE) Lots of fun, lots of work when single operator – best of contests! – (W6PYK) Did fair with my rain gutter antenna. – (WB4WLK/4) Found that one cannot expect good score if one goes to Saturday night party. – (WB9APC) QRM on 80 meters Saturday night was so thick you couldn't cut it with a knife (or a 180 watt PEP rig for that matter). – (WA1MYK)

### NOVICE WINNERS

(Top 10)

WN5DLY	60,306
WN6ION	29,700
WN3QNT	25,137
WN4TVU	24,750
WN5GIV	24,009
WN0GTJ	22,412
WN7TDZ	21,280
WN6GGP	16,848
WN4AJL	16,640
WN6RXI	16,184

Other Winners – WN2SXO, WN2FTQ, WN2FHX, WN7UQV, WN8IOT, WN8KEO, WN9KDY, WN9IHH, WN9JIC, WN0GRJ.

### THIRTY-NINTH SWEEPSTAKES CONTEST

Scores are grouped by call area. Sections, within call areas, are broken down by power category. Example of listings: VO1AW 7880-99-40-6 or final score of 7880, number of QSOs 99, number of sections 40, total operating time of 6 hours. An asterisk denotes a Hq. staff member, ineligible for an award. Multi-operator stations are grouped in order of score following single-operator station listings in each section tabulation.

Top left: Some of you might remember him as DL5BR. His now back in the states handing out rare W2-land WSOs as WA2CLQ. Jeff used a Swan 500 and four 811As to snag over 1000 QSOs in all sections from ENY on phone. Above: The antenna farm at WA2CLQ. The monobanders are (from the left); 5 elements on 15 at 42 feet; 3 on 20 at 46 feet and (stuck back in the tree) 3 on 10 at 40 feet. Left: A participant in many a contest is K4PUZ. Don topped Tennessee again this year on cw (for the sixth year in a row) with a fine 129K effort. His Heath gear feeds a TH6DXX and dipoles.

Below top: Using a DX-100, S-40 and R4 with a multiband vertical and 2 element 20 meter beam radiators W1DKU ran up a very nice 69K low power cw score to take the Western Mass. section certificate. Below, bottom: Participating in his first SS since his Novice years in 1966 WA0TKJ walked off with the section award in Kansas. A tribander and dipoles at 50 feet spewed his signals through the country for the tune of over 158K. Right: Some of the antennas of Mo. Section leader W0TDR. The 2 element 40 meter beam on top is at 75 feet. The lower beam is a 4 element 20 meter radiator. Warren has another tower that supports a 4 element 10/15 quad at 62 feet. These antennas can be fed by either of 2 S-lines followed by a choice of a L-4 or SB-220 afterburner. Not bad, eh?
