## ARRL International DX Competition

G3MXJ

REPORTED BY RICK NISWANDER,\* WA1PID

**T**HREE WE WERE . . . all hunched over our radios the Friday night of the second cw weekend, waiting for the contest to start. All the other weekends had been rather punk, but this time WWV was doling out N7 and DX was rolling in on 20 better than it had in some time. Helios, the sun god, was shining his ever lovin' light on us for sure. By the sounds of things we wouldn't have to be makin' hay only when the sun was shining — those ions would be bouncing around so much we could continue to rake in the QSOs late into the night on the higher bands. Then, from stage right, Griznoid, ruler of bad conditions, strode quietly on stage early Saturday morning, did a little dance and scampered off stage left. What a bummer! At least on the other weekends he did his dance earlier so we knew what we were in for. This time he let us get our hopes up only to dash them during the contest. *Sic frat crustulum.*

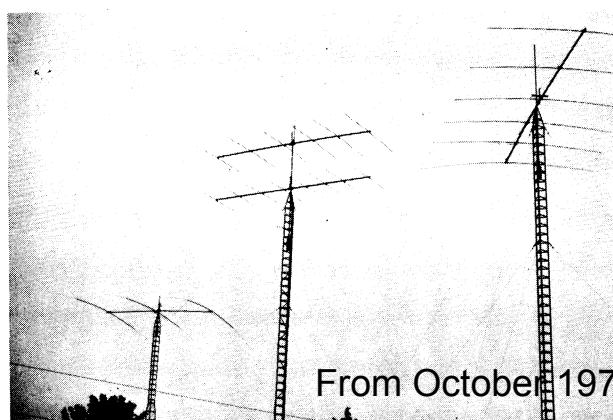

Even with Griznoid's fancy footwork, the second cw weekend exhibited the best conditions during the contest. The phone weekends (February and March 2-3) produced poor conditions with 20 being the only truly useable band for most, while 10 was only slightly open the second weekend (which was better than the first when it barely

opened at all!). The cw weekends (February and March 16-17) were considerably better. The first weekend was only so-so, but the second had a few pleasant surprises. Forty was outstanding the first day and a bust the second. Ten showed signs of life in the European direction (K6EBB even worked a G!). Fifteen provided Europeans for the Western reaches and even a few JAs for those on the Eastern seaboard. Even though things are not as good as they used to be they are not as bad as we think they are. Short, but sweet, openings will be the order of the day in the coming years and a quick hand on the bandswitch might make the difference between gettin' 'em and not.

Seldom does international tension or fringe-element violence cause anyone to *really* sit up and take notice. One particular story that broke in April hit close to home for many around the world. On April 12, 1974, Fred Laun, known in our circles as LUSHFL, was kidnapped from his home near Cordoba. Shot during the kidnapping, Fred was later released in none-too-good condition and was nursed back to full health in at least three different hospitals. As of this writing Fred has had the last of the major operations necessary to put him back together again and is now living near Washington, D.C. We join many others in wishing Fred a quick and full final recovery and hope that any of his future DXcapades be not quite as exciting.

Last year I was remarking how Fred just couldn't compete with those closer to the U.S. because of the distance problem. Well, he did it

\*Asst. Communications Manager, ARRL

These are the antennas that helped propel WA8ZDF to top Ohio and Great Lakes Division spot in the phone portion. The left antenna is 3 el on 40 at 100 feet. In the middle are 8 on 10 at 100 feet and 6 on 15 at 115 feet. The right tower supports 6 el on 20 at 100 feet.

anyway, distance or no. Fred's score, multiplier total and QSO total all set new South American cw records. In fact, his multiplier total is higher than any other DX multiplier count on either mode in any class!

That HC1CW you heard numerous times over both weekends is the marauding Michigander, K8UDJ, who was at TI2DX last year. Chuck should be around Ecuador for a few more years.

Incorporated in the writeup this year is a new box listing QSOs per band for the top 10 single op, top 3 multi-single and top 3 multi-multi W/VE entries on both phone and cw.

Log returns dropped only slightly (somewhat amazing in view of the mediocre band conditions). We tabulated 1070 cw logs - 776 phones and 125 check logs for a total of 1971 - about 6% down from last year.

Picking the winner of the Golden Pencil Award this year was difficult. HI8XAW finally came out on top. Congratulations, Allen. Honorable mentions go to ZF1AK, PJ8SE and OZ1LO who all turned in particularly nice looking logs.

This being the 40th anniversary of the ARRL International DX Competition a little bit of reminiscing seems in order. The DX Test started in 1927 (making it the oldest contest around) and, except for breaks in 1929, 1932 and 1941-1946, has been going strong ever since. The first installment required advance registration, a test message of 8 words to be sent, and ran from May 9 through 23! A couple of goodies showed up in the results of that first one - China and French Equatorial Africa. In fact, in 1930 we had no less than 3 China entries! Quotas were introduced in 1936 (quotas, for those of you that don't know, set a limit to the number of stations you could work from each country on cw - only 3 at that time!). All quotas were dropped in 1967. In 1955 the exchange was modified to what we have today. In the early 50s input power was sent by all, and before that a distinctive serial number was used.

The club competition was started in 1934, although gavels were not awarded until the 1938 contest. The South Bay Amateur Assn. of Long Beach took the first gavel and grabbed two more before the war interlude. After the hiatus, Frankford RC and Potomac Valley RC traded the gavel-winning honors amongst themselves except for 1950 and 1956 when Southern California DX Club got a couple and this year when Murphy's Marauders picked off one. In addition to hitting our 40th birthday, one other milestone was surpassed this year - total log submissions for all the DX Competitions passed the 60,000 mark in 1974 - 61,580 to be exact.

That's just a short thumbnail sketch of the DX Test. Many, many items had to be left off. We hope it provides you with a bit of insight into the 40-year history of the DX Competition. We also hope that you will receive as much, if not more, enjoyment from the contest during the next 40 years as you did over the last 40. Whether you are out to win or just to snag a few new countries the DX Test can provide hours of DX chasing fun. CU in '75.

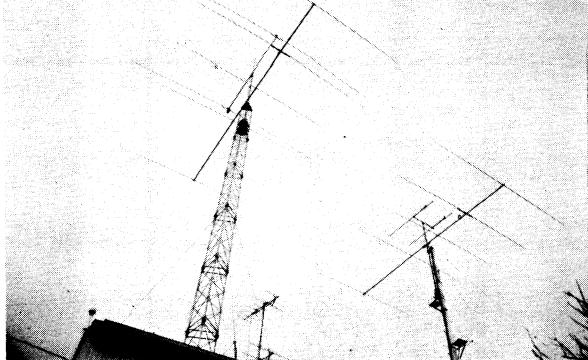

### SOAPBOX

#### Clicks

Very nice contest. It's sure exciting having stations pile up on you. I had my 14th birthday between the two weekends. - (KL7HER). Got my 100 foot tower up two weeks before the first cw weekend and it's going to come down one week after the second weekend. Been waiting 20 years for that tower and got to use it for 6 weeks. Oh well . . . - (W7NQ). This probably will not qualify for the Golden Pencil but it's better than

Number two in the world on phone and top Mexico is 6F8J. A quad and inverted vees helped Jose garner over 4000 two-ways and 3.3 million points. FB!

**JA1BRK** and antenna farm. The big tower supports 2 el for 40 at 90 feet and 5 for 20 at 80 feet. The other tower holds aloft 5 elements for 15 at 55 feet and two beams for 2 meters at 58 feet. During the contest a 10-meter yagi was installed at 82 feet on the big tower. The neat antennas and station layout helped Tac to a first place finish in Asia on both phone and cw. FB job!

getting one written on birch bark with a crayon. — (VK4ZV). With low power and a 25 year-old receiver one doesn't burn up the ether nor walk off with any honors but it is fun working new countries and new multipliers. — (W5SOD). Considering the sunspot cycle, conditions were excellent. Quite surprised to work 5 Europeans on 10 meters. — (K5ABV). Thanks again for FB contest. — (PA0TA). Murphy struck quickly the first weekend when the T-4XB was loaded directly into a 75S-3B. We found that Collins receivers don't work too well as dummy loads. — (W5KFL). Have missed only a few DX Contests since the spark days, even was in the one in the thirties that ran continuously for over a week. — (W2AWF). Raised my 133-foot center-fed antenna higher. It tangled with the 50-MHz yagi and exploded the tuner. While it was tangled I seemed to do pretty well on 3.5 MHz. Now I can't seem to recreate the favorable situation. — (W2PAU). Can't wait for the spots to return. — (WA0ENP). Conditions not too good any weekend. Glad for 10-meter opening second cw weekend, even if it was small. — (WA5SOG). This DX Contest is still the greatest. — (W2BQF). It wasn't a total disaster anyway. I got 7 new countries and 9 new prefixes out of it. —

(WN0JGT). In receive I actually lit 3 No. 47 pilot lamps across the coax with the TA-33 pointed east that first Sunday. — (W4OC). For two or three years now, this new idea of a 2 kw local making the DX come to him is making it less worthwhile for me to try for a high score or even send in a log. — (K9VQK). No interesting experiences except the loss of beam antennas and loss of HV power. Had lots of fun with 150 watts input. — (W3OV). My new beam was too big for the old rotor. Both weekends were spent with the beam held by rope in a northeast heading. — (K2KIR). Ten opened for a short time one afternoon while I was asleep. Nuts! — (W3NZ). Two years ago I was a stubborn phone man but I saw the light. — (F2XW). The highlight of the ordeal was when our 18-AVT, which was mounted in the surf fell over in the salt water about one o'clock Saturday morning. We washed it off in a beach shower and put it back up. — (ZF1AL). Operated with a very bad antenna from poor QTH surrounded by 6000 foot mountains. Many people found my callsign somewhat long. — (G3TXF/OE9). It's a great thing for a person of my QRP station to contact many Ws in a few hours. — (JF1DOC). One of these days I am going to be able to put in all the hours that the

bands are open without having to go to work. — (KG6JAR). I like working the ARRL cw Test because it is possible to work with very excellent operators. Congratulations to every USA OM. — (I6BQI). Thought you were magicians picking the dates when WWV was sending N7 Friday night, but Saturday night with that W4 announcement was surely enough to drive all but the big guns up the

wall. — (W4WHK). Very happy to work New Mexico and Idaho for my states numbers 49 and 50! — (OZ6PI). Took the afternoon before the test off from work and put up a 2-element quad directed to the U.S. for 40 meters and a vertical with a very poor groundplane for 80. — (SM5AYY). I happened to be 40 years old on the last day of the contest which caused some bad

The response to my plea for input on the club box format, while not overwhelming, was sufficient to indicate a desire to switch over to listing the clubs by call areas rather than by total score. For that reason, the club box format has been modified to be similar to the new SS club box style. However, there has been one change. In addition to the by-call-area listings, an indication has been made to show how the clubs ranked nationally by putting the overall place in parentheses after the club name. This format will be used from now on in the DX Competition as well as the Sweepstakes.

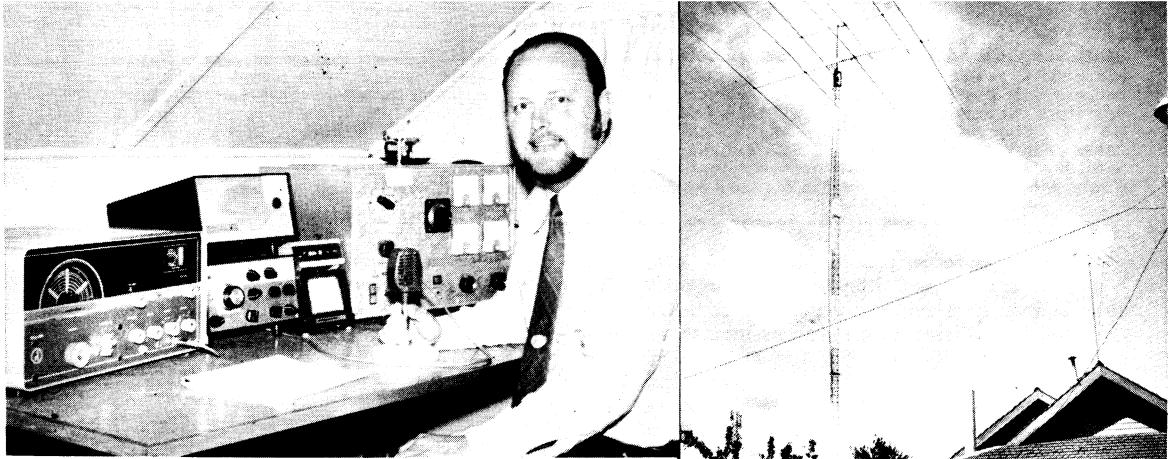

Four new clubs jumped into the top 10 listings this year. The San Diego DX Club, Honolulu DX

Club and Wireless Institute of the Northeast placed 7th, 8th and 9th (without any club entry last year!). The Indy DXers grabbed 10th spot — a jump up of 2 places from their finish in 1973.

Third spot worldwide and top South America phone honors were registered by CE6EZ from this nice Temuco layout. Ralf's antennas include 4 elements on 20, a 10/15 duobander and assorted wires for 40 and 80.

**local QRM! — (SM5BPP).** Hope to make a lot of contacts when conditions improve. — (UA3QYL). I am very glad to meet all my friends in this FB contest. — (UB5TQ). Let's do it again in 1975. — (UF6CX). W/VE operators remain extremely efficient and skillful. Our salute goes to QRPer K8EEG/Q. We just missed 5BWAS in this one. Where was Nebraska on 80 and 40? — (KZ5NG). I had much fun in this contest in spite of the poor conditions. — (DL7QU). Conditions here in the Arctic Circle were rather poor. — (OH9PF). Worked my first W1 on 80! Still hope to be on next year before going back to Moscow. — (UA0FGM). Had to fight off the Europeans on 10 meters and detoured briefly to exchange 599 reports with 3 JAs on 160. — (LU5HFI). I need a RIT for my transceiver! There must have been a hundred stations I didn't hear because I was using a sharp audio filter and could not move my receive frequency. — (WA6TLJ/HK6). This is my first DX competition and I am very glad. — (PY3CGJ). It is amazing how the two weekends differ in conditions. — (VE3EDC). Band really opened up for Europe on March 17. — (VE7ACZ). I won the CT section award three years in a row back in the 30s but can't keep up the pace nowadays. — (W1EWD). California can stay, but I sure wish the East Coast would fall in the ocean. — (WA8TBQ).

### Splatter

Generally crummy band conditions. — (W9LUH). I cried when I heard VR1AA (on 7 MHz) say we were all the same strength . . . just below the noise level. — (W4ZSH). W/VE amateurs must give thanks to the hundreds of low power DX amateurs who get on and make the ARRL DX Contest a success. — (W2MB). Enjoyed the contest as usual but it gets rather rough with only a monoband antenna trying to work all bands. However, next time it may be different. Think I said that last year too. — (KG6JAR). I would have gladly given up my only square meal, a three course dinner of pocket size Cracker Jacks, corn flakes, and Shredded Wheat, for a linear. — (WA6VYK). Worked in a contest for the first time in 16 years of being licensed just for a couple of hours to test ability to handle it. Now I am waiting for next year's with formal planning and hope to have time available. May I compliment American hams for their orderly procedures in the contest. — (LU6ACU/YV4). I got into the contest on March third purely by accident, but am I ever glad I did. It was such fun and having an OA call certainly added to it. — (OA4AKQ). First contest from Georgia after 16 years as K5MDX in Mississippi. —

(K4JRB). I think incentive licensing means hearing all the good stuff in the higher class bands. Passed Advanced on March 22. — (WA2AOG). Sure wish the DX Test's first weekend doesn't always coincide with the tail end of bird season here in VA. That's just when the dogs start working their best. Almost hope for snow so I don't have to make the decision about which to do. — (K4JYM). First contest since 1957 NR. Really enjoyed it. — (K0PVI). I'm looking forward to next year, but oh those sunspots! They probably won't have much sympathy. — (W0LP). My first test with a tower. Oh man, what a difference! — (W3ZSR). My little brother and our dog ate up all my groceries so I lasted for 56 hours on four gallons of oatmeal. — (WB9BPG). Biggest surprise was VE3AAI/SU calling me on 15 using his 20-meter beam. — (W4QNN). I extended a 6-foot flagpole on my apartment balcony for operation on 20-10. I also made a trap dipole for 40 and 75 and strung it in a rectangle in a small attic. Those apartment dwellers who cannot erect towers and big antennas can still participate and have a lot of fun in their effort. — (W4HVU). An errant match almost burned up logs. Name on match cover? Murphy Plumbing! — (WB2VFT). Interesting to note that when the JAs are in a pileup working us, one doesn't hear the Japanese equivalent of "He's working by districts, lid" or "He didn't call you, idiot" or "Don't transmit

The highest score in the contest was provided by this multi-single crew at YV4AGP on phone. From the left: YV4TI, YV4AGP, YV5CVE and YV4YC. The Signal-One/Alpha 77 combination pours its signal into a 4-element quad for 20-10 at 70 feet, a 3-element 40-meter yagi at 85 feet and sloping dipoles on 80 and 160. Now you know why they were so bodaciously loud!

when he is talking, stupid." — (WA6CPP). The biggest thrill was working UA0FGM on 75 meters. On March 3, the ZS boys were complaining that all they could work on 10 meters was Florida, which I happened to think was fine! — (W4BAA). In Dallas I used monband beams at 70, 75 and 80 feet. I moved to Cedar Rapids this last summer but did not have enough time to put up a tower so ended putting up 14-AVQ. I expected that the contest would not be fun with the 14-AVQ in view of what I was used to using in Dallas. I was surprised. Even with a vertical the thrill was still there. — (W0PCO, ex-W5EQT). At 2000Z the bands were wide open here but everybody had their beams turned to EU and Africa. I keep calling CQ here. — (WA6HRS, op. of KX6DB). The more we progress with equipment and antennas, the worse the propagation. Is this also Murphy's Law? — (SP5PWK). Multi-multi with one tower is a terrific way to ulcers and a bad strain on a good friendship. — (W6MAR). Next year's contest will not feature KZ5NG since our Navy base is closing down. — (KZ5NG). What a vacation and DXpedition all rolled into one; and XYLs approved besides (as they went along too). We were not after first place,

Top Africa in 1972 and 1973 was 5T5CJ. Jacques had problems with his transmitter this year and only worked about 200 QSOs the last day.

but we did have a ball being on the other end of the pile up. — (WA8RXU and WB8LSD, ops of VP2VBW). Had fun. Need better antenna. — (W7JUA). Too bad we didn't have the good old sunspots. — (W1ZM). Our linear only went up in smoke twice. — (WA4TOA). I think I'll move up to VHF now. — (SM6CKU). VE3AAI/SU was the big reward. — (W2RAD). I will be back again next year. — (CR6NO). Working through the W pile-ups is a real pleasure because of their discipline and courtesy. Eighty was too noisy on my side of the line, because of being summer here, and QRN was up to S9 plus most of the time. — (CE6EZ). Quite calling 7P8AD on 75 after I found him peaking from the West! — (W9LT). That first weekend sure was bad! Hope we don't have the same conditions next year. — (W8VPW). This was my first experience in a DX contest where I was on the DX side of the fence, and I must admit it was a most enjoyable experience. — (W2JKN, opr. of FG4AYO). Low sunspots and lots of rain static equals low score. Wait until 1980! — (W6EJ).

**1975 ARRL DX COMPETITION**  
Phone: Feb. 1-2, Mar. 1-2.  
CW: Feb. 15-16, Mar. 15-16.

**LOW POWER CHAMPS**

**Fortieth ARRL  
International DX Competition**

W/VE scores are listed by call area; DX scores are listed alphabetically by continent and prefix.

**Awards:** The operator of the first-listed single-operator station in each section or country is the winner for that area and receives a certificate award. The top-scoring multioperator station in each area also receives a certificate award. Awards are scheduled for an October 15 mailing. The top-scoring single-operator DX entrant for each continent each mode, receives an engraved plaque. Affiliated-Club awards are shown elsewhere in this article.

**Scores:** In the list to follow, read (from left to right): call of entrant, final score, multiplier (total countries per band for W/VE; total states and Canadian call areas per band for DX), contacts, approximate dc power input (A represents power up to and including 150 watts; B, over 150 and up to and including 500; C, over 500; D, combination of A+B; E, A+C; F, B+C; G, A+B+C), total time of operation to the nearest hour. Example: A2CCY 1,135,008-168-2252-A indicates final score of 1,135,008, multiplier of 168, contacts 2252, power up to and including 150 watts, operating time not furnished.

An asterisk following a call denotes an ARRL Hq. staff member, ineligible for an award.

**Top to bottom:** Alan, ZF1AK, utilized this setup to the tune of 1.2 phone megapoints. That's music to anyone's ears. Alan is ex-VP7ND. Eighteen year-old OE3EVA talked his way through 250 two-ways to grab the Austria certificate. Outside, Ernest has a TH3Jr at 60 feet. Even though he is shown with a mike, DK3GI made his mark on cw this year. Ron took the certificate for West Germany with a fine 975K effort. Contrary to appearances, there was no pussyfooting around at the PY7VNY shack on cw. Luk had over 1400 two-ways during the contest. Nice job, one and all.

Top left, proceeding counterclockwise: One of 27 cw entries from Poland is SP9CTW. He used 250 watts and a 20-meter dipole for his 131 QSOs. The gang that put ZF1AL on the air to the tune of 3.2 megapoints in one cw weekend. From the left: WA4SVH, WB4TAF, K4LDR, W4BRB and K4VC. The group did an excellent job of passing out ZF1 QSOs during their 48 hours of operation. WA8RXU and WB8LSD, operating phone as VP2VBW, are shown here looking for an opening on 10 which they never did find. Larry and Ed hit the air from BVI on the first phone weekend. Top dog in Saskatchewan on phone and cw is VE5RA. Doug called the phone test "all misery" but said the second cw weekend was "fantastic." W2JKN packed up his FT-101, a dipole and a 20-meter whip and whipped the masses into a frenzy on phone from French St. Martin using the call FGØAYO. Even though the contest was of secondary importance (since he was really down there vacationing), Buddy made 890 stations happy with

a new multiplier. We were most happy to see participation from TF3IRA (the Icelandic Radio Amateurs club station) shown here operated by TF3EB. Fourteen other TF3s joined him in making over 750 cw two-ways. That loud signal from G3UBR is due, in large part, to these skyhooks. A 3-element 20-meter beam graces the top of the big tower at 70 feet with a tribander below at 60 feet. The other tower supports various delta loop combinations for 40 and 80.
