

Results: 1975 ARRL International DX Competition

PJ2VD

REPORTED BY JIM CAIN,* WA1STN
and JIM WHITE,** WA1NNC

PJ2VD, PICTURED ABOVE, exemplifies a spirit which was overwhelmingly evident among participants in the 1975 ARRL DX Competition; Joeke set a new all-time South American cw record despite poor conditions. He continued a tradition begun many years ago by "Deserving DXers," as a popular DX Bulletin calls them, of making the best of less-than-good odds. The former S.A. record, which Joeke broke, was set by Fred Laun as LU5HFI last year, under not-worth-writing-home-about propagation. We have decided to retire Griznoid and not worry about his infernal sunspots.

In the past, when changes have been made in contest format, we have had to start over keeping records and statistics. The new high- and low-band categories of competition begun this year should not create such problems, however. We shall provide some all-band statistics for your information, relating participation and achievements this year to past events. The high- and low-band records made this year are, of course, all-time records and you may enter them in your notebooks accordingly. If the accent of this writeup seems to be on the all-band competition, it is because that traditional aspect of the ARRL DX Competition was chosen by the majority of the participants. Next year we can discuss high and low band compared to 1975.

Total-entries data is as follows: 1973, 2107; 1974, 1971; 1975, 1835. The all-time record was 2822 logs received for the 1970 DX Competition. The reason for the down-trend is, of course, worse conditions. Many comments on logs received this year were to the effect that the "little guy" really suffers most when the ionosphere is uncooperative. Suddenly, that vertical or dipole isn't good for 50

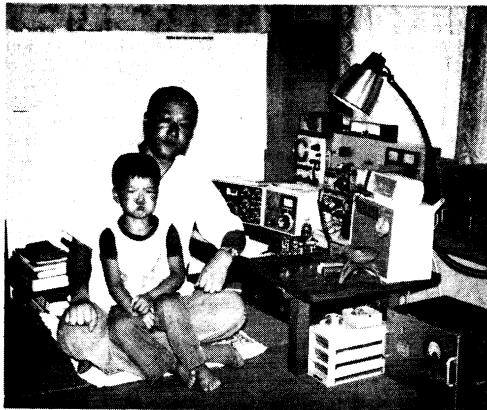

or 60 countries on 10 and 15 meters like it was five years ago. As a result, the stations which aren't super-equipped are capable of making perhaps one-tenth of the contacts they could have made easily in 1970. Operators of those stations accumulate only a page or so of contacts and don't bother to send a log in. This applies to both W/VE and DX participants, naturally.

Total phone logs this year: 897; total cw: 938. All-band accounted for 1140 out of the 1835, while high and low-band entries numbered 530 and 165, respectively. A word about these totals is in order, to keep things in perspective. Many entrants did not specify entry in one of the specialized categories, even though their operation was concentrated in, say, the low-band area or the high-band area. If an entry was confined solely to low bands or high bands, it was automatically placed in that category for scoring and listing purposes. This is an important point because it underscores the fact that there was not that much actual competition in the specialized classes in 1975, i.e., there were few all-out efforts to achieve a certain score, for instance. Part of this stems from the lack of past experience on which to base our efforts. No one knew what an outstanding low- or high-band effort would be. Next year, with the 1975 benchmarks to go by, competition will probably pick up.

A few efforts by the specialists stand out: the K6SVL high-band phone score of over 900K points would have placed seventh nationally in the *all-band* listing. WA8ZDF's big yagis for the high bands remained deenergized while Doc applied rf to a 3-element rotary on 40, a Hy-Tower on 75, and a dipole on 160, talking his way to the best score in the low-band phone listing. W1EBC managed over 90 multipliers on 75 during his low-band effort, a figure rivaling the multi-operator stations.

* Asst. Communications Manager, ARRL

**Contest aide, ARRL

"We're not going to take these rotten conditions sitting down! — JAØAT

In the low-band cw division, K6OVJ grabbed top spot, thanks to a hoard of Japanese contacts on 40, followed by K5ABV with a nice combination of multipliers and QSOs, with K1NOL close on his heels. High-band cw provided an interesting race between the "coasts," with W2GXD the winner over K6SDR by virtue of about a dozen extra multipliers. The scores are now there to shoot for . . . one can only wonder how many, if any, of the top scores from this year will hold up through the 1976 Test.

Anyone with a \$19.75 pocket calculator can dig out the last few years' worth of *QSTs*, turn to the DX Competition writeups, and begin turning out statistical comparisons. We'll try to give you a sample, and go from there when you're looking for something to do on a non-contest weekend. The average score on cw among 1975 Top Ten operators was 1.2 million, down from 1.375 million in '74. On phone, the calculation is 1.241 megapoints, up from 1.134 in 1974. 1974 will go down in history as one of the worst years on record for phone conditions, both weekends. Things weren't so bad this year, perhaps.

Many individual performances were outstanding this year, and most can be found by scanning the various "leader" boxes in this report. A few valiant efforts were buried among the general listings, however, and we'd like to bring them to your attention. As you can see, the top DX scorers are primarily in North and South America and in Hawaii, where the competition was especially fierce. Lest we forget those DX stations who are located out of the favorable areas but who still accomplished much, we offer the following: ST5CJ, a million points on cw and a half-million on phone; JA2JW, number one both modes, and UAØFGM, number two, from Asia; CT2BN with over a million cw points; ZL3GG, a truly superlative million-pointer on cw and over 300K on phone; ZL1AFW with over 1000 cw contacts; ZS6DW made over a million points on ssb, including oh, so many on 75 and 40; VK4VU managed over 800 contacts on phone. None of the aforementioned appear in the "Top Ten" boxes, but can be found in a potful of W/VE logs.

On the low-band front, we would draw your attention to JR1BRV, cw, and FØAXP, who made 301 contacts on 40 and 80 the second cw weekend operating as C31IU. His card will be showing up in many future 5-band DXCC applications! Outstanding low-band phone tallies came in from JA1ELY, EA4LH, and JA2IYJ, among others.

Top DX high-band cw scores came from KH6s IGC and IEG, followed by CP1EU, KH6IAC and JA2MGE. HC1BU and KP4EAS continued the Western Hemisphere monopoly, running off with the two best high-band phone scores.

On cw (all band), K2SIL operated one weekend using KH6RS and made a Top-Ten score, then loaned his station and other call, KH6GPQ, to pal K2KIR, who proceeded to place *that* call in the Top Ten. Bud (KIR) lost the bet on who could make the better score, due in part to poorer conditions the second weekend (that's what he sez, anyhow). F5QQ used the call FY7AA the first cw weekend, then loaned his station to K3BSY, who keyed FY7AK; both made the Top Ten.

The golden pencil award goes to PJ2VD; not only did Joeke have the highest score in the contest (higher even than the best phone score) but he also sent in nearly the neatest log. The deciding factor was that the PJ2VD log was his original, operating log, not a copy. He clearly marked duplicate contacts in the margin, leaving them in the log for bleary-eyed contest checkers to see. That method is much preferred over recopying the log, at least for checking purposes.

On the affiliated club front, a reshuffling of last year's top three took place, with Frankford moving to the top, PVRC to number two, and Murphy's Marauders to number three. Frankford's victory can be attributed to several eye-popping single-operator scores, a number of excellent multi-operator efforts, and an organization which succeeded in getting many of the "small guns" out making points in bunches. The combination of all three methods of making points was necessary to win, and they did it beautifully.

Dropping out of the Top Ten clubs this year were the Honolulu DX Club and the Indy DXers (Indianapolis); their places were immediately snapped up by the Southern Cal. DX Club and the up-and-coming Northern California Contest Club,

CAC member K8HLR participated Low-Band, both phone and cw.

who placed sixth in their *first* DX Competition as an organization. All four entries from W6-land made the top ten clubs listing!

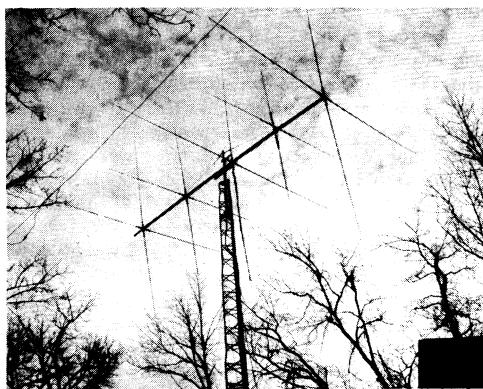

We could go on and on, of course. Main point is that we're all in there working, regardless of conditions. The DX was there to be worked this year, even for the casual participant, and it is that casual operator, both W/VE and DX, who makes the contest great. Our four weekends in February and March are our own method of ionospheric research, practically applied to a set goal; working various parts of the world on given frequencies.

Stand by for certificates around the end of October, then on to the 1976 ARRL DX Competition. Latest word (from our optimistic source) is that conditions will be better than in 1975. We have a pessimistic source, too, but we wouldn't consider for a second paying attention to him!

Soapbox

Fired up my 6AU6 amplifier, adjusted the output to 100 mw, and UKØZAB came back on the first call, for my fifth continent at that power level. — (W9PNE). As the shack warmed up a hornet came out of hibernation, climbed inside my 24-hour clock, and threw the time off one hour. — (W7HS). A lack of Russian stations, with the notable exception of UAØFGM, who was everywhere. — (W4BAA). Spent four daylight hours on the tower (130 foot) fixing a busted rotor. — (W3LPL). WØEEE has managed to double its score in each major contest of 1974-75; looking forward to further improvements in the future. — (WBØGQP). I want my own linear or else want everyone else's to blow up. — (WA3SXH). [How about *both*? — Ed.] Had more equipment trouble and wind damage in four weekends than in the previous sixteen years of hamming. — (WA6NYV). Thank goodness for the hundreds of European low-power stations; without them my little ole. tribander at fifty feet wouldn't be very competitive. — (W2MB). I can't wait to go to Hawaii or the Caribbean for one of these contests. — (WB2KNZ). I don't know why I enjoy it, but still a lot of fun. — (W2BQF). While WA2SRQ and WB2RKK operated, I served as chief cook, bottle washer, logger, dupe sheet keeper, band changer, beam pointer, and propagation advisor; the youngsters are welcome here as long as they don't start calling me "Pop." — (W2YD). Enclosed pictures were taken during the all-day power failure on Sunday of the second phone weekend. — (W3ZSR). Missed four good hours after nearly being electrocuted by my amplifier. — (K6SVL). Besides DXing during the contest, I practiced some fruitful Official Observing on 14,200. — (WA7OBH). My line noise was about S-6, allowing for easy preselector peaking. — (WB9GGD). Only managed to work BV2B four

times. — (W6ONV). After 48 hours of continuous operation during the first phone weekend, I attempted the drive home. When I recovered my car from the ditch the next morning, the side view mirror and radio antenna had been torn violently loose, pieces of splintered wood and barbed wire were caught in the front bumper, horse-hair was tangled in the windshield wipers, and my only clear memories were of the screams of angry razor-back hogs. All of this took place in L.A. City. No problem, though; the logs were intact. — (WB6OLD, opr. at W6HX). Happiness was finding 3B8CV vainly calling CQ between two large pile-ups and only me paying attention to him. — (WBØHOG). Got 41 countries with an attic trap dipole in a townhouse. — (W4HVU). Just as much fun as it was 40 years ago. — (WØLP). Had no equipment of my own, so I traveled to the home of TJ1EZ for the contest. — (TJ1AD/WB4WHE). My 31st entry in the ARRL DX Competition. — (F8VJ). I have been participating in this event since the 1930's, and 1975 produced the worst conditions in memory; even 160 was down this year. — (EI9J). I only wait for the conditions to become better! — (JH2RVP). Since I could only operate the first weekend, please enter my log for checking purposes only; 1778 contacts is not up to par for me. — (YV5KL) [Thanks, OM; many newcomers will be able to obtain DXCC credit from your log. — Ed.] After three years of waiting, got cable TV two weeks before the contest; love it! — (KH6IAC). The low-band category is ideal for Europeans, since the bands are open when television is not operating, making for fewer TVI interruptions. Conditions were so bad that it was the hardest-working ARRL DX contest I have ever entered. — (G2RO). Conditions the last three hours of the cw contest on forty almost made up for the otherwise rotten propagation. — (G2QT). About

Just this quad at 48' and some wire antennas were all WA1KID needed to place eighth on phone, all-band.

one-and-a-half hours straight was all I could operate, before I just had to go swimming. — (ZF1LM/W8LUI). I want to QSO with W stations on Top Band. — (JA5EZI). Made 26 contacts on 7 MHz with 2 watts. — (JA7AVG). Never heard stations that are not W6, 7, 8; where were they? — (JA4PPR). Heard very little past the East Coast. — (G5BJM/WA2YVK). PA0GN is still active as a memorial station. We are hot on passing the one-million mark, but we'll never reach this goal without more Canadian activity. — (PA0ERA). No U.S. signals heard at all here on 15 or 10 meters, although we listened every hour from 1300 to 1700. — (PA9WRR/K6WR). Suggest U.S. stations listen below the DX Window on 160; I called many on their own frequencies below 1825 with very little success. — (ZF1AK). QSLs are pouring in (after the contest); the mailman hates me, and we eat on the dining room floor. — (V2PE... K2FJ).

Yep, the "59005" from OA8V was for real!

Forty-First ARRL

International DX Competition

W/VE scores are listed by call area; DX scores are listed alphabetically by continent and prefix.

Awards: The operator of the first-listed single-operator station in each section or country is the winner for that area and receives a certificate award. The top-scoring multioperator station in each area also receives a certificate award. Awards are scheduled for an October 15 mailing. The top-scoring single-operator DX entrant for each continent each mode, receives an engraved plaque. Affiliated-Club awards are shown elsewhere in this article.

Scores: In the list to follow, read (from left to right): call of entrant, final score, multiplier (total countries per band for W/VE; total states and Canadian call areas per band for DX), contacts, approximate dc power input (A represents power up to and including 150 watts; B, over 150 and up to and including 500; C, over 500; D, combination of A+B; E, A+C; F, B+C; G, A+B+C), total time of operation to the nearest hour. Example: A2CCY 1,135,008-168-2252-A- indicates final score of 1,135,008, multiplier of 168, contacts 2252, power up to and including 150 watts, operating time not furnished.

An asterisk following a call denotes an ARRL Hq. staff member, ineligible for an award.

FEEDBACK

Feedback from the November, 1974 Sweepstakes Contest. See results in May, 1975 QST.

1. KH6RS should have been listed as the Pacific Division leader, multi-operator, cw, instead of W6BIP.

2. WA5LES should have been listed as Clean Sweep both modes, W2FR and W5ONL/VE3 both Clean Sweeps on cw.

3. WA3PHQ (EPa, cw) should have been listed as low power, and the cw winner for the Penn Wireless Association should have been K3HNP, not WA3PHQ. WA3PHQ was listed as WA3PHO in the phone scores.

4. WB8JBM and all operators there were incorrectly listed as WN8 callsigns. Also, WB8JBM/8 should have been listed as the Great Lakes Division leader on both modes, multi-op category.

5. WA0RLD, low-power class, Minnesota, phone, should have been listed as sixth, with a score of 20,094. The Minnesota low-power phone winner then becomes W0OWY.

6. K4FOB should have been listed as low power, phone, North Carolina, instead of high power. That places him first in N.C. in the low-power category and seventh in the "QRP Champs" listing on phone.

7. WA8YWX (cw, Ohio, low power) was operated by WN8RQU. That makes him the top Novice score, with 27,018 points.

In the MAVTI-40, Part I, June QST, in Fig. 1, page 36 the value for C6 should be 180-pF, silver mica. Also, R19 should be 6.8 ohms, not 6800 ohms.

In Part III of "Learning to Work with Semiconductors," for July 1975, the following changes and additions should be noted. In Appendix I:

$$X_{RFC1} = 10 \times Z_{IN} = 1320$$

$$X_{RFC2} = 10 \times Z_O = 50$$

$$X_{C1} = \frac{A}{Q+B} = \frac{2244}{25.16} = 89.19$$

$$C_1 = \frac{1}{2\pi f X_{C1}}$$

In Appendix II:

$$XL4 = \frac{QRO' + (RIN' RO'/XC14)}{Q^2 + 1}$$

$$XL5 = \frac{QRO + (RIN RO/XC16)}{Q^2 + 1}$$
