

# Results: 1975 NOVICE ROUNDUP

REPORTED BY JIM CAIN,\* WA1STN

**H**Ighlights of the 1975 Novice Roundup include: a new national record score; close races in WPa, SFla, Va, and Miss; 38 entries from Ohio, including 20 over 10,000 points; and last but most important, reported participation by 442 Novices and 164 non-Novices.

The new record belongs to Mike Rosenfeld, WN5IWJ, who put it all together in both total contacts and multipliers. Mike missed only one state, North Dakota, and one Canadian province, VE8, among the ARRL field organization's sections. Thirteen DX countries accounted for the remainder of his multiplier. The new record surpasses the previous one by over 9000; WN3UTA's 1974 record score lasted a scant one year.

The difference between numbers one and two in Mississippi was 675 points, the telling factor being a 15 wpm ARRL Code Proficiency certification for the winner. Matter of fact, 170 Novices out of 442 entries used such certification to boost their scores. The highest claimed (and verified) was a 35 wpm decoration on the wall of WN3VJK, followed by WN1TBY and WN2TVU at 30 words per.

WN8RUO led the tough Ohio section, one which has a history of high contest activity at all levels; it is hard to imagine anyone ever not working that section in any contest! To be fair, however, Ohio does have more licensed amateurs than any other single ARRL section, followed closely by Illinois. Perhaps there is a pattern, because Michigan had two-thirds the entries of Ohio this NR, and has almost exactly two-thirds the amateur population of Ohio.

Through 1971, the Novice Roundup lasted 40 hours; the record was established that year at 74,000 points, by WN7OTT/7. It looked as though it might be a long time before that number of points would be topped, after the activity was shortened to 30 hours in 1972. Indeed, 1972 and 1973 top scores were "down" into the 60K range, but in '74 and '75 it was back up the ladder to new highs. VFO availability to Novices starting with the 1973 NR have undoubtedly had much to do with the rising scores; ten-meter band privileges, as can be seen from the "Top Ten" box, have had no effect. Activity by non-Novices *has* made a difference, though; over 50% of this year's winners' contacts were with W, K, WA, and WB stations.

Still a problem is CQing by the non-Novices. A tongue-in-cheek suggestion in our write-up for the

\* Asst. Communications Manager, ARRL.

1974 was a "dis-Honor Roll" for stations doing such CQing. Happily, there was almost no support for such a drastic move. A few Novices (and a couple of others) did bother to make up such lists. The common complaint was not necessarily that such stations take up so much room on the band, but rather that they tend to "steal" a Novice's frequency. To this, as to any controversy, there are two divergent points of view. The non-Novice can make contacts faster if he calls CQ, and after all, he is there to make contacts. To the Novice tuning the band looking for a spot to CQ, though, it may appear as though his slot in the spectrum is overrun with non-Novice CQing.

Some suggestions were in favor of writing into the rules a clause that non-Novices are prohibited from CQing; that would be about as effective (and sensible) as ordering Grand Prix drivers not to "draft" during a race. Even if such a rule were written and generally complied with, where would we be when we *need* the higher-class licensees CQing, on an empty ten-meter band for instance? A knotty problem it is.

On a brighter note, most everyone enjoyed the 1975 NR, as usual. The enthusiasm of neophyte Novice contestants is contagious . . . many of the non-Novices comment that the NR is their favorite operating activity. Every operator in the NR is a youth, no matter what his or her age. — WA1STN

## Soapbox

Higher-class licensees gave me 50% of my score. — (WN6HDR). How about a power limit on those higher-classers? — (WA2SNE). NR for me meant "No Reply." — (WN1STJ). I practice Kung Fu in my spare time so I often operate wearing my outfit. — (WN8QFW). I like the one-week format since 24-hour straight contests are "out" for me. — (WN1TYT). I like the shorter time period, since I

If we had a Golden Pencil award for the Novice Roundup, it would probably go to this gent — WN5MCJ, S. Texas.

Top left is WN8PAF, who came in eighth this year in the highly competitive Ohio section. Bob used a dipole and triband beam outside to augment the vintage Collins gear shown here. WN1SSL, pictured above right, managed 373 contacts in a single-band 80-meter effort from East Mass.

### TOP TEN

WN4FNZ faced a handicap most of us don't have to worry about . . . coming in out of the hot South Florida sun to do some operating. Marc managed 13 hours and 198 contacts out of the rays.

get a kick out of staying up 24 hours straight, like Field Day. - (WN1TIR). Got 3 Utahs on 80! - (WN8SEN). My XYL doesn't understand contests except for the fact that I'm talking to someone else more than her. - (WN4IVR). Never knew QRM could be so enjoyable. - (WN2TXY). Never had so much fun, and learned a few things, too; how to tune, how to listen and then write, and how to knock off un-needed words. - (WN3YMV). I had to quit in the middle of the contest because my General ticket came. - (WN2WBH). They closed school Friday just so I could make some more contacts . . . or was it because of a foot of snow? - (WN7ZWP). My QRP (5 watts) wasn't so much of a handicap after all; antenna and organization seem to be a fairer percentage of a good score than power enthusiasts might believe. - (WN7YPF). Just wish a ham or two lived in Alaska. - (WN8RDN). First weekend 15 was BLAH; but second one, WOW. - (WN6WBF). Was reluctant to participate in the NR until the day before it ended; sure wish I'd started sooner. - (WN9NLA). Found 10 meters open Feb. 8 but worked only a couple

of Novices; heard lots of activity in other parts of the band. — (WN0MQM). Novices had plenty of trouble with my call. — (KX6BB, 4Z4NNG/W2). Hardest part was answering all the QSLs that came in. — (WA3LML - Delaware). Would like to see more emphasis on accuracy in exchanges. — (WN0MMA). Tried staying up all night a couple of times, but drove people up the wall with my fist, which generally collapsed around 2 A.M. — (WN7WWL). Would have taken NLI but my report card came after 12 hours and couldn't operate any more. — (WN2RMO). After 9 solid hours of operation, I cooked breakfast on my finals. — (WN6GLC). XYL puts up with having the shack in the bedroom, but she balked when I tied a temporary 15-meter dipole to the bedpost. — (WN8SYA). All but one or two of my dupes were with non-Novices, and one even tried to work me three times. — (WN5MID). Worked all but two states: ND and KL7. — (WN3YLO). Didn't do very well, but at least I beat my mom, WN9PTY. — (WN9PTX).

ARE YOU LICENSED?

- When joining the League or renewing your membership, it is important that you show whether you have an amateur operator license. Please state your call and/or the class of operator license held, that we may verify your classification.
