# The 1997 ARRL September VHF QSO Party Results 

When the clock strikes 1800 UTC on Saturday of a contest weekend, and Tom appears at the controls of his VHF/UHF radio station, he is psyched up, geared up, and ready to roll. Nothing stops Tom. He is a superstar in VHF contesting. The Tom we are talking about is Tom Whitted, WA8WZG, who just completed the VHF grand slam-a four bagger! Tom finished first place in all four major ARRL VHF/UHF contests in 1997. Great going Tom! It all started in the January VHF Sweepstakes: first place, single operator. June VHF QSO Party: winner

Jon, N2SZL, says, "Just one more contact. I know I can make it through just one more contact."

Jack, AB4CR, ponders the situation, "Now let's see. Should it go this way, or that way?" With a first-place rover finish, they must have had the antenna pointed in the right direction.

WA8WZG. August UHF Contest: again WA8WZG tops the list. The September VHF QSO Party puts the icing on the cake as Tom finishes in single operator first place. Tom
operates from his superb Port Clinton, Ohio location in EN81, overlooking Lake Erie. He really knows how to put the microwave bands to his advantage. He works all bands from

## A First Time Experience

## By John Toscano, KBØZEV

The September VHF QSO Party was my very first Amateur Radio contest, and I had a great deal of fun. I didn't originally plan to enter the contest because I was quite busy that weekend. Besides, what could I accomplish with an FM-only station? But a friend of mine, Phil, KBØNES, was persistent. He wanted me to get on the air just long enough to give him a contact point. Finally, I relented.

I gave Phil a call on 146.55 MHz and he replied right away. His signal was weak, but clear. We tried 446.0 MHz next, but neither of us heard the other. I went back to 146.55 to tell him of the failure, and to wish him well in the rest of the contest. I wasn't quite prepared for the call that came immediately afterward from a total stranger. Okay, l'll give him a contact point, too. Then there was another call, and another. The next thing I knew, I was in too deep to quit!

I had no expectations of a first-place finish, but the band conditions were so hot during the weekend that I was able to make plenty of contacts. I accumulated a score that I consider to be quite respectable. I was pleasantly surprised by the incredibly positive attitudes I encountered on the air during the contest. The phrases "please," "thank you," "good luck," and "have fun" were abundantly heard. Conversely, when I became overwhelmed by trying to keep track of all my contacts, I started making dupes. My errors were always pointed out politely, in spite of the fact that I never mentioned that this was my first contest and that I was a total neophyte to the game.

With my modest FM station I was able to make contacts with nearby Minnesota, but my range also extended to Nebraska, Iowa, Wisconsin and Michigan. My farthest contact was on 2 meters with a station in EN64. He came booming in with an extraordinarily clear signal, even though he was running less power than I was! Stations located between us, in Wisconsin, remarked that they had their antennas pointed at Minneapolis and heard his signal coming in on the backsides of their beams.

My equipment consisted of a Yaesu FT-5100 dual-band mobile rig, powered by an Astron RS-20M power supply, feeding about 40 feet of Belden 9913 coax, to a Cushcraft ARX-270N dual-band omnidirectional vertical antenna. The antenna was mounted on my roof at a height of 25 feet. I also used an ICOM IC3AT hand-held transceiver, feeding a Hustler CG-220 mobile antenna. I guess I must have done a pretty job in modifying that mobile antenna. I made four contacts on 223.50 MHz which gave me four more grid squares. Actually, several of those contacts were only successful because of the equipment and expertise of the operators on the other end. I was gratified that experienced operators would waste 5 to 10 minutes of precious contest time to dig my 1.25 -meter signal out of the noise.

My first Amateur Radio contest far exceeded my expectations, and it was a terrifically uplifting experience. I plan to encourage more ham friends to give it a shot during the January VHF Sweepstakes!

6 meters through 10 GHz .
The September VHF QSO Party win wasn't as easily done as it may appear. Jeff, WA2TEO, was right on Tom's heels in second place. Jeff is no one to take lightly. If you make a bad choice of bands to operate on, or take a break at the wrong time, Jeff will be right there slipping past you.

The Mt Greylock Expeditionary Force, W2SZ/1, headed up by Dick, WA2AAU, did an outstanding job in the multioperator category by racking up over 900,000 points to secure a first-place win. This group has been operating from Mt Greylock in Western Massachusetts for many years-and winning! They have placed first in the multioperator category every year for the last 11 years. In 1986, operating on Mt Toxaway in Western North Carolina, WS4F slipped by them for the win. This was the only blemish in their perfect record since 1980. Hats off to Dick and his well-oiled contest machine.

In the limited multioperator class, competition was a quite close and fierce, with all top eight finishers scoring over 100,000 points each. The crew at W4IY topped the list, and W4NH finished in second place. This limited multioperator category is becoming increasingly popular. Part of the attraction is only having to muster equipment and antennas for four bands. This fact alone makes it more desirable for many groups. To be competitive in the multioperator category, it takes a lot more equipment and bands.

QRP portable is a great category for those without a good station or location at home. It doesn't take a lot of equipment to be competitive. Also, the 10 W output limit is perfect for many portable rigs. All you need is a good spot and a game plan. Pete, K9PW, surely knew what he was doing. He easily took first place by 73,000 points over second place Zack, W1VT.

The rover category is another one that keeps gaining in notoriety. We had a total of 68 rovers in 1997, as opposed to 54 last year.

The limited multiop gang at W6TOI wasn't looking at the beautiful scenery. They ranked number one in their section.

Jack, AB4CR, along with partner Gerald, W8ULC, roved to 14 grid squares, during their first place victory. Brian, ND3F, finished second place rover, while visiting eight grid squares.

Band conditions this time around seemed to favor the central US more than anywhere else, with some nice north/south openings. Reports from the northeast reveal some of the flattest conditions we've had in a while. Check out the QSO and multiplier boxes. You'll find quite a few central US stations making the listings.

The September VHF Pin Program is still alive and doing well. Over 400 pin collectors are flaunting their 1997 pins. This program was also designed to attract newcomers and increase activity during the contest period. It has surpassed its goals! We had a record number of entries in the 1997 September VHF QSO Party-752 entries. This is an in-
crease of $4.9 \%$ over last year's 717 entries. We also had a number of first timers participating in the contest. Check out the sidebar "A First Time Experience."

See you in a few weeks for the January VHF Sweepstakes, January 17-19. That's the big kick-off of the 1998 VHF contest schedule.

## Soapbox

Activity was down but a lot of new calls active. Still got a new grid and noticed fewer clusters of hams on the calling frequencies (K1DAT). Not much operating time, flat conditions, but contest is still lots of fun (WA1T). Some said conditions were flat in the northeast. I saw a few bright spots in the propagation. I can't complain. A lot of new stations on, and the rover category seems to continue to grow (K1LPS). Conditions were rather flat. Signals from Canada seemed stronger and there were more around, maybe more hams got active up there this time. Six meters had the greatest improvement (WB1GQR). Poor band conditions, looking for better conditions in January (N1MIA). There was virtually no skip activity, but

West Coast Region (Pacific, Northwestern and Southwestern Divisions; Alberta, British Columbia and NWT/Yukon Sections)

Pictured from left to right at their limited multioperator station, N6RMJ, are Jim, WB2ODH, Pat, N6RMJ, and Dick, K6KWQ.

With his futuristic-looking antennamobile, Don, WA2VOI, took second place rover in the Dakota Division.
it was fun working stations via line of sight. Biggest thrill was working into FN12 and four stations in FN33 (WB2AMU). This was my first contest ever and I think I am hooked (KC2BEZ). Adding the microwave bands to our operation has added to our enjoyment of the contest (K3MQH). Although the number of contacts seemed to be down, the camaraderie on the band seemed to be up. Everyone seemed to be taking the conditions in good spirits and having a grand time--I did (W3HOA). Spent 10 hours removing antenna and reinstalling it on newly erected tower. Hopefully next contest will be more relaxing (KB1YZ). It was great to get on 903 MHz (AA3GM). We had a lot of new people on 6 meters this year, but the bottom dropped out of everything after lunch on Sunday (K4KAZ). I would like to commend the K8GP crew for their true contest like sportsmanship. Thank you for showing us the way on 6 meters (W2YV). My first VHF contest. Wish I had a mountain to be on so I could have done better. I know in the future, I'm going to try and get more hams involved (AE4HG). This was our first VHF QSO Party and we had a great time. Looking forward to the spring already (KE4YBS). Activity was down and conditions stunk, but I'll be back next year (KD4UPF). Conditions were nothing to get excited about, but it was nice to finally get on 432 after all these years and pick up the extra multipliers (K4MSG). No band openings or skip but participation seemed better this year (N4BG). This was our best showing ever in September. We had a great time, beautiful weather and excellent food. Thanks to KA4CKI our master chef (W4IY). Perfect weather made for great camping but lousy conduct. Where was the cook KE4ZQD when we really needed him? Running 2 meters of

## -Q denotes QRP Portable

-L denotes Limited Multioperator
course (W4NH). Not too much activity on 2 meters in Arizona (WB7OIC). Operated from Horse Mountain contest site in DM54 at 7900 feet (K5AM). Thanks to all the Rovers! Their activity brings a new dimension of strategy to the contest. You guys in the "Great White North" need to listen for the southwest more often (K9MK). Band openings to South Dakota and Minnesota helped, also Rovers are a shot in the arm (K5SW). The students and I had a good time, just had fun. Poor band conditions
the first day, but good the second day. As always we will look forward to the EME and all other VHF contests (WD5AGO). This was the UT Club's bestever September VHF QSO Party. Worked several first-ever grids including WA5BU in EM11 (W5EHM).I just parked my truck on a ridge line above the San Fernando Valley, put up beams for 6, 2 and 432 and had a blast for 8 hours (WA9STI/6) Activity was down but Rovers were up. No "E" openings again, but meteor scatter paid off with a

Scores
Each line score lists call sign, score, stations worked, multipliers, number of grids activated (if rover), entry category ( $\mathrm{S}=$ single operator, $\mathrm{L}=$ limited multioperator, $\mathrm{M}=$ multioperator, $\mathrm{Q}=\mathrm{QRP}$ portable, $\mathrm{R}=$ rover ), and bands ( $\mathrm{A}=50 \mathrm{MHz}, \mathrm{B}=144 \mathrm{MHz}, \mathrm{C}=222 \mathrm{MHz}, \mathrm{D}=432 \mathrm{MHz}, 9=902 \mathrm{MHz}, \mathrm{E}=1296 \mathrm{MHz}, \mathrm{F}=2304 \mathrm{MHz}$, $\mathrm{G}=3456 \mathrm{MHz}, \mathrm{H}=5760 \mathrm{MHz}, \mathrm{I}=10 \mathrm{GHz}, \mathrm{J}=24 \mathrm{GHz}, \mathrm{K}=47 \mathrm{GHz}, \mathrm{L}=75 \mathrm{GHz}, \mathrm{M}=119 \mathrm{GHz}, \mathrm{N}=142 \mathrm{GHz}, \mathrm{O}=241 \mathrm{GHz}, \mathrm{P}=300+\mathrm{GHz}$ ). Call signs of division eaders and band indicators are listed in boldface type.
