

1998 ARRL January VHF Sweepstakes Results

By **Billy Lunt, KR1R**
Contest Manager
and **Bev Fernandez, N1NAV**
Assistant Contest Manager

January is infamous for uncooperative weather. Our friends in the Northeast and Canada can surely attest to this. They were hit with one of the worst snow and ice storms in the history of the contest. The ice in some areas was so thick that trees and telephone poles snapped like toothpicks. Some of the northern areas were completely isolated from the rest of the outside world. If you had trouble finding those usual VE1s, VE2s, VE3s, and some of the W1s and W2s, they were probably covered with ice and without electricity! Regardless of all the weather problems, some of the diehard contestants in the Northeast were on the air, even if their rotators wouldn't turn. Ray, WIREZ, reports, "I found that conditions were good to excellent, however, due to thick ice and wind, activity was very low toward Canada, Nova Scotia and the Maritimes."

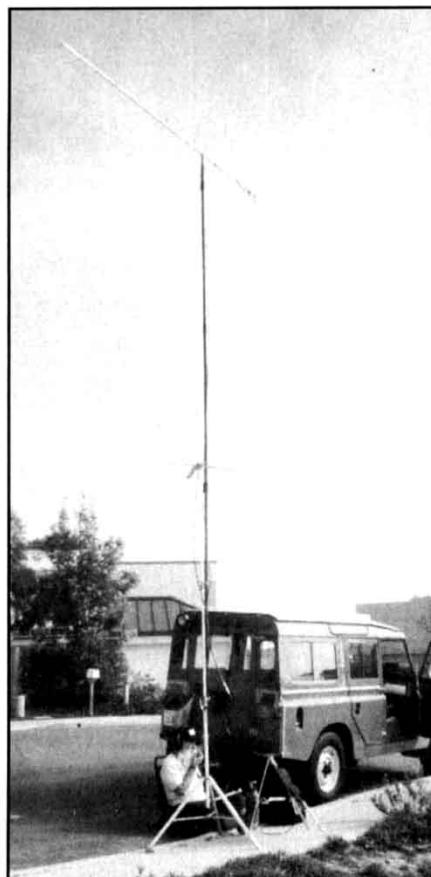

Despite the foul weather, participation was higher than we expected. In fact, we managed to top the 1000-entry mark. You can always count on a good turnout for the January VHF Sweepstakes. With Club Competition, our Affiliated Clubs make sure their members are out in force. They have a way of enticing their members to get on even if they only have FM gear.

This year's VHF SS attracted quite a few rovers. Considering the weather conditions, it is remarkable that so many rovers set out for those needed grid squares. When band conditions are poor, and when nearby grid square multipliers are hard to come by, rovers offer us those much appreciated grid square multipliers, especially on the microwave bands. Some rovers go that extra mile—figuratively and literally! Check out the sidebar, "A Plan to Activate a Record Number of Grid Squares."

Propagation during this year's contest wasn't the best, but we still enjoyed some short sporadic-E openings on 6 meters dur-

ing both days. We received reports from just about everywhere that 6 meters opened for about two hours each day. John, K5IUA, writes, "Awesome 6 meter E-skip! Possibly, this was a once in a lifetime January contest. I finally broke the 300 QSO barrier here in South Texas."

The score boxes tell the whole story on

John, KE6GFF, doing some curbside contesting in the ORG section.

what the top stations did in each category. Take a few minutes to look over the standings, especially the region boxes detailing the local competition.

K3MQH set the new Multioperator record at 695,372 points. Great going! There were also 16 division records set: single operator: AA2UK, N6HKF, K5IUA; QRP portable: N8XA, W8TL/3; multioperator: K3MQH, WA8WZG, N5WS; limited multioperator: W7XU, K8EB, N7STU, N6RMJ, N5XU, VE3TMG; rover: W3EKT, VE3OIL. The *Contest Yearbook* has all the contest records in it (see the ARRL Publications Bookcase elsewhere in this issue for ordering information).

Special mention goes to the four-man crew of N6RMJ. They combined the use of rovers and the plentiful participation from the Southwestern Division to smash their own limited multioperator record from 1996 by more than double the points. The Southwest may be the area to watch in the future for those perfecting the use of rovers

(continued on page 91)

Like most contestants in the Northeast section of the country, Lawrence, WA3CSP, had to contend with heavy snow, ice and freezing rain.

A Plan To Activate A Record Number Of Grid Squares

By Tim Marek, K7XC

At the 1997 WSWSS (Western States Weak Signal Society) September VHF Conference, I outlined to Ward, WB7VVD, my plan to surpass N0LRJ/R's record of 20 grids activated during a contest. Before long we had agreed to work together in the attempt. I would provide the vehicle and gear for 50, 144 and 432 MHz. Ward would provide the equipment for 222 MHz as well as 1.2 and 10 GHz.

We began the January 1998 VHF Sweepstakes in grid DM04 atop Mt. Gleason above the Los Angeles basin. Hoping for some contacts with Arizona and Nevada, we stayed two hours longer than planned. We did quite well, but missed the Arizona contact.

Murphy visited us Friday when the 222 MHz transverter took a dive. Nothing we did brought it back to life, leaving us with my trusty ICOM IC-3AT hand-held driving a 120-W brick into a $\frac{5}{8}\lambda$ mag mount antenna. Even so, we made numerous 300-mile QSOs on the band.

On 1296 we used a single W6OAL big wheel antenna with tremendous success. Many thanks to OAL for getting it ready in time for the contest! Ward brought a 10-GHz rig in the hope of working some of the LA microwave gang. The Palos Verdes 10-GHz beacon was booming in at 20 dB over S9, but we could not find a single station to work. My new gear for 50, 144 and 432 (DX70T, TR751A and TR851A) worked flawlessly. The ability to switch from M² Yagis to KB6KQ loops was a big asset on 144 and 432 MHz.

Saturday we raced north through grids DM14, DM15, DM05, CM95, DM06, CM96, CM97, CM87, arriving in CM88 at 3 AM. After a three-hour nap in "The Rude Room" (a motel room featuring mildewed carpets and utterly lacking heat, a phone or TV), we were on the road before 7 AM. Now it was onto grids CM98, CM99, CM89, CN80, CN90, CN81, CN91 and CN92!

By now the weather had gone from sunny and warm to cloudy, wind and rain. Almost out of gas, we limped into CN82 as it began to snow. We switched to four-wheel drive, then stopped to fill both fuel tanks and size up the situation. We had activated 19 grids. With a little more than four hours left, we adjusted our route to avoid the mountain passes and headed north once again.

Tim's partner, Ward, WB7VVD, sets up at one of their many Rover stops

CN93 was fun—if you enjoy traveling on snow and ice covered roads at night. After what seemed like an eternity, we broke into grid 21, CN94, with 20 minutes left in the contest. From here we worked all the way into Seattle and even heard our first VE7!

Our trip wasn't over by any means. After a night's sleep I still had to drive Ward to his work site in Tokeland, Washington, before I could turn around and go home. I was on the road a full seven days, leaving Reno Thursday afternoon for Los Angeles and arriving home 1 PM the following Wednesday. In that time we covered a total of 2900 miles. That's a lot, even by my standards!

Our final score was a bit over 107,000 (the best I have ever done) and we set the new record of 21 grids traveled. Even so, Ward isn't happy. He's addicted! He wants the #1 Rover spot, and this coming September we will be back. This time we'll be on every band from 50 MHz through 24 GHz and Laser. Who knows, we might even break our own 21 grid record!

-L denotes Limited Multioperator

and attracting newcomers to VHF/UHF contesting.

In the ARRL Affiliated Club Competition, two of the three gavel winners finished comfortably ahead of their competition. The Mt Airy VHF Radio Club easily took the unlimited category with 2.8 million points. The Delaware Valley VHF Society won the local category with 165k points. In the medium club category, the top three spots were quite close. The Potomac Valley Radio Club took the gavel with 1.7 million points. The Northeast Weak Signal Group was second with 1.58 million points, and the Rochester VHF Group was third with 1.56 million points.

The crew at N6RMJ. From left to right: Richard, K6KWQ; Pat, N6RMJ; Ed, WA6DJS; and Jim, WB2ODH.

Scores

Each line score lists call sign, score, stations worked, multipliers, operating category (S = single operator, Q = QRP, M = multioperator, LM = limited multioperator) and band (A = 50 MHz, B = 144 MHz, C = 222 MHz, D = 432 MHz, E = 902 MHz, F = 1296 MHz, G = 3456 MHz, H = 5760 MHz, I = 10 GHz, J = 24 GHz, K = 47 GHz, L = 75 GHz, M = 119 GHz, N = 142 GHz, O = 241 GHz, P = 300+ GHz). **Bold** typeface denotes Division Leader.
