

# IARU HF Championship 2018 Results

## By Bob Raymond, WA1Z (bobraymondwa1z@gmail.com)

Whether you carved out a few hours at home, traveled to a strategic QTH to maximize points per contact, or even traveled to your contest QTH by canoe, there were plenty of ways to have a great time in this year's IARU HF Championship!

The IARU HF Championship was one of the most anticipated contesting events of 2018. By itself, it is one of the most popular contests of the year, but it also benefits once every four years from added excitement surrounding the World Radiosport Team Championship (WRTC) which takes place on the same weekend. With the eighth WRTC held this year in Germany, we saw a 23% increase in submitted logs over last year, 4,946 - the second highest number of logs in the history of the contest.

Considering where we are in the solar cycle, conditions were relatively decent. Summertime propagation in the northern hemisphere always presents a challenge, but with a little adjustment in expectations and some patience, there were interesting contacts to be found this year.

There were many reports that polar paths were in good shape. Bill, KH7XS, expressed disappointment with low band conditions in his post on <u>3830scores.com</u>, but reports he was able to capitalize on excellent night time conditions on both 20 and 15 meters. It was the first time he had ever heard short path from Europe at 10PM local time. He even worked a few of the low-powered WRTC stations on 20 meter Phone.

Carl, WS7L (operating as W7TVC), has a challenging path between his QTH in Oregon and eastern Europe, but reported on 3830scores.com that auroral flutter usually experienced on Scandinavian signals was lower and found copying Russian and Ukrainian stations less of a struggle than in the past.

Rich, VE3KI, made a last-minute decision to skip operating from his home station in favor of operating the VY1AAA remote station at VY1JA's QTH in Whitehorse, Yukon Territory. Knowing the path to Europe would be in sunlight for the entire contest, he opted to spend most of his time on 20 meters and managed to work 48 of the 63 WRTC stations across the polar path. Rich even managed one QSO each with England and Canary Islands on 40 meters in between focusing on the southern paths through darkness on the low bands.

Farther to the east, Pierre, VE3KTB, operated VYØERC, handing out Zone 75 to the deserving while battling windy and snowy conditions on the ground.

Even when operating in a Phone category, the CW paddle is never out of reach for 1<sup>st</sup> Place W/VE Phone Only winner, Dan, W7WA (photo courtesy of W7WA)

#### **Single Operator**

For the third year in a row, the P33W superstation in Cyprus was home to the highest Single Operator, Mixed-Mode, High Power score. Each time, the station has been piloted by a different person with Sergey, UT5UDX, doing the honors this year. Sergey also set a new category record with a score of nearly 6.7 million and a significant lead over second place finisher, Slava, UA4HTT (operating as UA4S). Phil, VA3AT, finished third in the World and first place in W/VE.

Axel, KI6RRN, is the first place champion in the Mixed-Mode, Low Power category operating from WA6TQT's impressive station southeast of Los Angeles. Axel was the only operator in this challenging category to to break 1 million points this year, just shy of 2,000 QSOs. Max, UR3CMA/UY7C, put in a fantastic effort in second place, making over 1,300 QSOs.

If Low Power isn't challenging enough, there is always QRP where LZ1YE took advantage of some high band openings to break 1,000 QSOs and beating out LY5G for the best overall QRP score.

In the Phone Only category, Rein, ES5RW, bested Damir, RK9AX, in a competitive race in the High Power class. Meanwhile, Bill, K4XS, pushed his KH7XS station on the big island of Hawaii to a third place finish.

Dan, W7WA, is often found in the Phone Only High Power category finishing at or near the top of the W/VE standings. Dan's effort this year is no exception with another impressive first place result from western Washington state. He reports being mindful that July is typically a challenging time of year for propagation to Japan even from the northwest corner of the US 7<sup>th</sup> Call Area. To make matters worse, Dan says this year only "a handful of Europeans [were worked] on 15, 20 and 40, almost all of which were the big HQ stations."

So what does Dan enjoy about the IARU contest year in and year out? "More than 1,600 W/VE callers kept me busy," he says, "even when the sunspot count is down I still enjoy tuning the bands during the IARU to see what summertime propagation will offer."

Olivier, ON4EI, frequently visits Ireland and usually operates using a green energy power source. Unable to use his wind-powered generator due to calm breezes this year, Olivier opted to operate with solar power. After a second place finish in 2016 in the Phone Only, Low Power category, he improved his score in 2018 to a decisive first place finish.

Single Operator, CW Only, High Power was the most competitive category this year. R3ZZ, RG6G, KP2M and UR5MW (operating as UW1M) all finished with over 2.7 million points and within just 35,000 points of each other. In the end, Alex, R3ZZ, edged out Alexey, RG6G, for first place. RG6G worked more QSOs, but R3ZZ was able to overcome Alexey's effort with a slightly higher multiplier count. Similarly, W1KM, K1KI, and N4AF (operating as NY4A) fought it out for the top spots in W/VE. Howie, N4AF, worked the most QSOs with over 2,400, but Greg, W1KM, and Tom, K1KI, were able to take advantage of multiplier opportunities to overcome Howie's rates. By the end, W1KM finished just ahead of K1KI for first place.

In CW Only, Low Power, Paolo, IK3QAR piloted IR4M to first place in the World in his first serious Single Operator effort in the IARU HF. Larry, K7SV, took the top spot in W/VE while managing to just break into the World Top Ten.

In the QRP categories, first place World in Phone goes to Gabor, HA5NB, and CW goes to Helder, CT7AJL.

Three new world records were set in the fledgling Unlimited categories this year. Leonid, RA5A, and Alexandr, UA5C, both traveled to Canary Islands and set new Phone Only, High Power and CW Only, High Power records, respectively. Not to be left out by his fellow countrymen, Jack, R2AA, countered with a new Mixed-Mode, High Power record from his home QTH.

Vic, N8OO, earned the top W/VE score in the Mixed-Mode High Power category, while Clint, W9AV, finished atop Mixed-Mode, Low Power (more on Clint's operation later). Robert, NX5M, delved into QRP Mixed-Mode while in the midst of a new station build to make over 600 QSOs and run away with first place in W/VE.

#### Multioperator

After a second place finish in 2017, the team at RM9A took first Place in the World from their QTH in Asia with RU1A taking second place overall and the top score in Europe. The team at HG6N edged-out country rivals HG7T for third place. For the second straight year, the K5TR team finished in first place in W/VE.

#### **Headquarters and IARU Special Stations**

The rivalry among the national societies from France, Germany, and Spain continued with all three teams finishing at the top of the Headquarter Societies standings for the third straight year. TMØHQ (REF, France) wins this round with DAØHQ (DARC, Germany) finishing second and last year's winner, EF4HQ (URE, Spain) finished third.

NU1AW (IARU) operations were shared between the stations of K9CT and WB9Z. W1AW (ARRL) was

staffed by a smaller-than-usual team of just seven operators at one station, WW4LL.

Thanks to the World Wide Radio Operators Foundation (WWROF, <u>www.wwrof.org</u>) for providing the log-scoring for the HQ station competition.

#### Hams Just Wanna Have Fun

Sometimes it can be fun to try something entirely new or something that hasn't been done in a while. Breaking out of the usual routine can keep things interesting. The important thing is to do something that is *fun to you* and use a contest to work on your operating skills. Several of us used IARU HF to do just that.

Some folks, such as K1LT, used the high activity on the bands to work on their ARRL International Grid Chase numbers.

"Dink", N7WA, reported on <u>3830scores.com</u> he had not done an all-band DX contest in years. Even though he is in the middle of a shack remodel, he decided to operate All-Band, CW Only, High Power this year, and did quite well in the process. While Dink says staying awake for the full twenty-four hours was a "real struggle," he had an ingenious way to help him get through those final hours: he set a kitchen timer to ring every 20 minutes, just in case he fell asleep!

"It never had to wake me up, thankfully," he says.

Clint, W9AV, didn't set out to do a "serious contesting event" as he describes. Rather, this year's effort was a "trial-run for additional operations" from a special site, a sandbar near his cottage along the Wisconsin River.

Clint, W9AV, operating his generator-powered station (photo courtesy of W9AV)

Clint and his childhood friend Quent, W6RI, had hoped to operate from the sandbar during Field Day in June to relive a similar experience they had as kids when they operated portable from an island along the Mississippi and Alabama border. Unfortunately, high water levels prevented them from making the trip before Quent had to return home to California.

However, the sandbar became accessible in time for IARU HF. With Clint's wife providing a helping hand, the pair transported station equipment over two canoe trips to the sandbar. Although they were delayed three hours due to thunderstorms, once on the sandbar, they erected a 16-foot ground-mounted vertical, base-loaded for 40 and 80 meters, with 10 radials buried in the wet sand.

Clint reflected on the operation saying, "Since [the sandbar] is away from civilization and power lines, the noise level was low except for the thunderstorm QRN. With few obstructions and a good view of the horizon in all directions, we had a decent signal, although some stations that we could hear could not hear us".

Clint digs out signals on the low bands after sunset (photo courtesy of W9AV)

Still, with a generator-powered, 100-watt station, Clint's trial run resulted in 800 QSOs in 19 hours of operation, good enough to earn first place in the Single Operator Unlimited, Mixed-Mode, Low Power category!

#### **World Radiosport Team Championship**

The eighth World Radiosport Team Championship (www.wrtc2018.de) was held this year near Wittenberg, Germany with 63 two-person teams competing against each other. WRTC teams operated under special Multioperator, Two Transmitter rules that precluded them from entering IARU HF Championship, officially, but anyone who had propagation to Germany heard these low power stations all over the bands.

With all operating sites situated in the eastern part of the country that once comprised of the German Democratic Republic (East Germany), the organizers secured permission to assign callsigns from a now-rare prefix, Y8, once used to identify stations from the area prior to German Reunification in 1990. Again, something different to make things *fun*!

In the hours leading up to the event, many prognostications being shared among the attendees at the WRTC Headquarters hotel included seeing Gedas, LY9A, and Mindis, LY4L, on the medal podium at the closing ceremony. After a disappointing sixth place finish at WRTC2014, a score that was undoubtedly tamped-down by a computer failure that left them without the ability to use a second radio for several hours, Gedas and Mindis (operating as Y81N) finally achieved their goal of winning WRTC gold in Wittenberg.

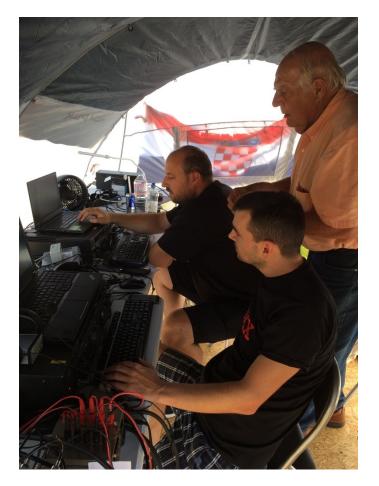

Much to the delight of the hundreds of hardworking volunteers that made WRTC 2018 a tremendous success, hometown heroes Manfred, DJ5MW, and Stefan, DL1IAO, (operating as Y81A) took the silver. Defending gold medalists Dan, N6MJ and Chris, KL9A (operating as Y82V) took the bronze.

All WRTC 2018 stations had the same antennas on equal terrain. Each boasted a rotatable Spiderbeam for 20-10 meters, a 40 meter dipole along the tribander's boom and a fixed 80 meter dipole. (photo courtesy of 9M6NA)

The organizers created several awards to encourage IARU HF participants to dig deep and work the teams. There was a Sprint competition (work all the 63 stations as quickly as possible), a Distance Challenge (add up the number of Kilometers per QSO), and some old-fashioned Worked All WRTC awards.

A staggering 44 of the 63 teams broke the 4,000 QSO barrier from their low power stations. None of those incredible numbers would have been possible without the many contesters who made working WRTC stations their primary focus.

Dave, 9A1UN, and Hrvoje, 9A6XX, prepare their WRTC station under the watchful eye of their referee, Kurt, W6PH. Dave and Hrvoje operated as Y81U and finished in 16<sup>th</sup> place. (photo courtesy of W6PH)

#### Let's Do It Again!

Be sure to save the date for another exciting weekend in the 2019 IARU HF Championship scheduled for July 13-14 starting at 1200Z.

One of the great aspects of IARU HF Championship is that it is an everyone-works-everyone contest with lots of activity worldwide in a compact 24 hours. The contest is now in its seventh consecutive year of receiving over 4,000 log entries. Sunspots or not, the bands will be filled with plenty of opportunity to have some mid-summer fun! And with so many mode and power categories to choose from in this contest, you don't necessarily have to travel to a special location to garner some bragging rights for a year.

Page 5 of 11

See you then!
