

2022 FIELD DAY

Scores (continued from page 73)

Score listings are grouped according to the number of transmitters in simultaneous operation and their entry class. The listings show the club or group name, call sign(s) used, total number of QSOs, number indicating power output used (5 is less than 5 W, 2 is less than 100 W), number of participants, and total score including bonus points and ARRL Section. Entries are listed from highest to lowest claimed score in each class: Class A stations are clubs or groups portable with three or more participants; Class B stations are portables with one or two participants (when there are two operators, the other operator's call sign is listed in parentheses, if it is known); Class C stations are mobiles; Class D stations are home stations using commercial power; Class E stations are home stations using emergency power, and Class F stations are EOC stations. This listing contains Class D and E home stations and Aggregate Scores.

Home Stations — Commercial Power
