2026 ARRL Field Day Results

Amateur radio's biggest event of the year saw 30,629 participants make 1.24 million contacts.

Max Freedman, N4ML
ARRL Education & Learning Support Specialist

Ham radio once again took center stage the fourth weekend in June for the running of ARRL Field Day. Amateur radio operators from the US, Canada, and beyond submitted 4,251 log entries from all 85 ARRL and RAC Sections, and 29 DX entities.

Those at home (Class D and E) represented 50.8% of the entries, with those in the field or at an EOC making up the other 49.2%. More than two-thirds of the entries had only a single transmitter, but the Conejo Valley Amateur Radio Club, AA6CV, had a whopping 25 transmitters on the air during the weekend. Class A made up around 30% of entries this year but was responsible for 61% of all Field Day contacts.

More than 1.24 million QSOs were made during Field Day. The Potomac Valley Radio Club, operating as W3AO, made the most contacts, with a 9A entry that had more than 10,000. Phone and CW modes gave us 38% and 37% of the contacts, respectively, with the last quarter being digital. This means more than 900,000 of the contacts made on Field Day were done with a non-digital mode. The average number of QSOs per Field Day entry was 292, with the median being 110.

Want to be in the top 10% of Field Day stations by QSO total? That requires putting in at least 729 contacts based on this year's data.

The Delta Amateur Radio Club's, W4BS, Get on the Air (GOTA) station was a family event during ARRL Field Day 2026. Tyler Henley, KQ4QEV, served as the GOTA coach. Here, he's watching as his son, daughter, and wife all get on the air and make successful DX contacts to Italy, Germany, and other entities. [Photo courtesy of Delta Amateur Radio Club, W4BS]

Entries by Class Summary

Class	Entries	% of Total
A	1,254	29.5%
B	631	14.8%
C	52	1.2%
D	1,549	36.4%
E	613	14.4%
F	152	3.6%
Total	4,251	

2026 Field Day Overall Statistics

		% Change
Number of Participants	30,629	–4%
Total Entries	4,251	–3%
Checklogs	151	–8%
CW QSOs	461,686	0%
Phone QSOs	468,119	4%
Digital QSOs	311,323	6%
Total QSOs	1,241,128	3%

Activity by Class

Class A — Club or non-club groups of three or more people who set up temporary/portable Field Day sites away from their usual station locations: 1,254 entries (29.5%).

Class B — Club or non-club groups with one or two people who set up temporary/portable Field Day sites away from their usual station locations: 631 entries (14.8%).

Class C — Mobile or rover operators from vehicles, bicycles, and boats: 52 entries (1.2%).

Class D/Class E — Stations operating from home, with either commercial power (Class D) or emergency power (Class E): 2,162 entries (50.8%).

Class F — Stations operating from or as EOCs: 152 entries (3.6%).

Transmitter Classes

Class	Class Definition
A	Three-person or more club/non-club portable using emergency power
AB	Per above, with battery or alternate non-generator power source
AC	Per above, but with commercial power
B1	One-person club/non-club portable using emergency power
B1B	One person per above, with battery or alternate non-generator power source
B1C	One person per above, but with commercial power
B2	Two-person club/non-club portable using emergency power
B2B	Two persons per above, with battery or alternate non-generator power source
B2C	Two persons per above, but with commercial power
C	Mobile stations
D	Home stations using commercial power
E	Home stations using emergency power
F	EOC stations

Total	30,629

Checklogs — 151 entries were classified as checklogs if they reported more than 50 QSOs and either did not supply the required list of calls sorted by band and mode (also known as a dupe sheet — or we'd accept their Cabrillo log), showing that no duplicate contacts were counted twice in their total band/mode QSO counts, or were stations in Class D, E, or F that exceeded the maximum allowable power output for their entry class (as stated in the Field Day rules).

From the Crowd

More than the band conditions during the weekend and contacts made, it's the stories from Field Day that stick with you years after the individual event. For Jack, KC3M, Field Day was his opportunity to introduce Jacob, his youngest grandson, to amateur radio. Jacob ended up making all the voice contacts for their Field Day entry.

For the South Mountain Radio Amateurs (SMRA), GOTA became an unexpected challenge — and not for a lack of interested parties. SMRA teaches a quarterly Technician licensing class, so all of their prospective GOTA operators were already licensed and eager to operate without GOTA assistance!

Year of the Club

Field Day brings a lot of clubs together for their biggest operating and social event of the year, and with this being the Year of the Club, we saw many strong club entries. Your club's entry in Field Day may help those chasing the America250 Worked All States (WAS) affiliated club endorsement, so consider uploading your log to Logbook of The World® (LoTW®) and help people confirm contact with ARRL Affiliated Clubs in all 50 states during the semiquincentennial. If you need help with LoTW, reach out to the LoTW helpdesk at **LoTW-help@arrl.org**. You might find that your club qualifies for America250 WAS (**https://america250.arrl.org**) or LoTW operating awards (**www.youtube.com/watch?v=wshQe4qKN1s**).

2027 and Beyond

Next year will be the 94th ARRL Field Day. What are you planning in order to top this year's effort?

Scores

Score listings are grouped according to the number of transmitters in simultaneous operation and their entry class. The listings show club or group name, call sign(s) used, total number of QSOs, number indicating power output used (5 is up to 5 W, 2 is from 6 W to 100 W, 1 is between 101 W and 500 W), number of participants, total score including bonus points, and ARRL Section. Entries are listed from highest to lowest claimed score in each class: Class A stations are clubs or groups portable with three or more participants; Class B stations are portables with one or two participants (when there are two operators, the second operator's call sign is listed in parentheses, if it is known); Class C stations are mobiles; Class D stations are home stations using commercial power; Class E stations are home stations using emergency power, and Class F stations are EOC stations. Due to the high volume of entries, this listing contains only Class A, B, and C stations (these stations are often portable or mobile, representing operations done outside of home locations, and are most representative of the "field" in this communications exercise). Class D, E, and F stations and aggregate scores will be posted in the digital edition of *QST* and on the ARRL Field Day page at **http://field-day.arrl.org**.
