

Contacts made at EOC Station One during FD 2020 on Alternate Power (Solar charged batteries). These were all made using solar charged batteries, and many more than five contacts were made using alternate power. But for the purpose of claiming the alternate power bonus points, the first five contacts are relevant/reportable.

All the contacts shown in the "call" by AA3YB were made from Station One using Alternate Power.

Solar Power charging station used to charge batteries for Alternate Power operations.
