P. O. BOX 13777

READING, PA. 19612-3777

To Whom It May Concern,

The Reading Radio Club held it's annual Field Day at Heritage Park in Sinking Springs, PA. This years setup consisted of two HF stations, a VHF/UHF station, and a Digital HF station. The VHF/UHF station was operated only when the second HF station was off the air. All our transceivers we powered by a gasoline powered generator provided by one of our club members.

Ron Waszk, K3RJW, was our designated safety officer for the event. Ron is an experienced fire police officer and was present for the entire event except for dinner on Saturday evening. Ron has filled out the Safety Checklist and it is included in our submission. I can verify that Ron was active in making sure that our club was practicing safe operation during the entire event.

Harry Hoffman, W3VBY, operated a solar station on 2 meters. An image of this setup is included in our submission for your verification. Again, this station was not operated unless one of the HF stations was taken off the air. The solar panel powered a small 2 meter HT for operation.

To verify, due to low attendance in the face of the COVID-19 pandemic and oversight during operation, no more than 3 transmitters were ever on the air at the same time.

73,

Christopher Schlegel, K3ADA

RRC President
