

Associated Radio Amateurs of Long Beach
PO Box 7493
Long Beach, CA 90807

The Associated Radio Amateurs of Long Beach Club Station W6RO was set up in the parking lot of Home Depot / In-N-Out on the corner of Atlantic Avenue, and Spring Street in Signal Hill, California. Short videos (choppy due to internet connection) show our public location can be found here: <https://www.facebook.com/KE6LB>. We were set-up inside a Vehicle with an external Aerial antenna secured outside. Solar Panels, and the Vehicle Motor (Diesel Generator) were used for power. We had several people stop by and visit our location, but only 4 operators. K1BLU was the main Safety person, and Point of contact, and the other three operators (KN6KAT, W6JVV & KM6VTW) took turns at the site, in shifts, with K1BLU sanitizing the equipment in between. We posted Photos to Facebook during the event, and after publicizing the event. Scott (KJ6PCC) was also on-site to send off our NTS messages. We sent one to the section manager Diana (AI6DF) and 6 others submitted by club members. We set-up around 7am Saturday 06/27, and took things down at 11:00 AM Sunday 06/28.

Respectfully submitted by

A handwritten signature in black ink that reads "Ryan Reid".
